The Future Of Religion:

The Future of Religion Rodney Stark, William Sims Bainbridge, 1985 Religion is alive and well in the modern world and the social scientific study of religion is undergoing a renaissance For much of this century respected social theorists predicted the death of religion as inevitable consequence of science education and modern economics But they were wrong Stark and Bainbridge set out to explain the survival of religion Using information derived from numerous surveys censuses historical case studies and ethnographic field expeditions they chart the full sweep of contemporary religion from the traditional denominations to the most fervent cults This wealth of information is located within a coherent theoretical framework that examines religion as a social response to human needs both the general needs shared by all and the desires specific to those who are denied the economic rewards or prestige enjoyed by the privileged By explaining the forms taken by religions today Stark and Bainbridge allow us to understand its persistence in a secular age and its prospects for the future

The Future of Religion and the Religion of the Future Theodore John Rivers, 2011-11-25 In *The Future of Religion and the Religion of the Future* Theodore John Rivers explores the changing relationship between technology and religion Rivers draws upon his expertise in the fields of medieval and religious history to discuss how the promotion of Christianity and monasticism in the Middle Ages began a process that has lent religious undertones to the way in which we interact with modern technology Rivers ultimately suggests that the growing presence of technology makes it a likely candidate for the next religious form competing with all the major religions in place today

Ethics and the Future of Religion W. Royce Clark,2022-02-03 W Royce Clark observes that humanity appears to be jeopardizing our own future in a chaos of mutual antagonism and hypocrisy Religions have traditionally provided ethical guidance but because their absolutized metaphysics are incompatible with each other we cannot rely on any one of them in a religiously pluralistic culture The ethics of various religions are also built on theocratic or authoritarian foundations which are incompatible with any democratic society Finally many of their premises are very ancient so not relevant or appropriate in our modern scientific world The Western Enlightenment brought challenges against religion s singularity exclusivity heteronomy and anti scientific assumptions all of which disrupted their ethics and the Absolute metaphysical grounds upon which those ethics rested raising the question of whether a freestanding ethic was possible Inasmuch as the primary claim of most religions was regarded as beyond challenge but was a conflation of history and myth modern historical method created more doubt than certainty about such allegedly certain doctrines as Jesus is the Son of God By the end of the 20th century the impossibility of validating such primary Christological claims from a historical approach became evident despite the articulate attempts at credibility in the brilliant works of John Dominic Crossan and Wolfhart Pannenberg which remained unconvincing in important ways Between 1832 and 2014 innovative Christian theologians such as Schleiermacher Hegel Tillich and Scharlemann took a detour from the futility of historical verification This study examines their remarkable attempts at a form of corroboration of the basic Christological claim even if their primary interests were more in Christology than ethics The question Clark takes up here is whether or not these figures have thereby provided a base for a universal ethic or the only answer is for principles freestanding from any religion *The Future of Religion* Richard Rorty, Gianni Vattimo,2005 Two prominent philosophers explore the place of religion belief in contemporary society **After God** Don Cupitt,1997-04-18 Considers the fate of religion the evolution of religious belief from the dawn of the gods to their twilight and tomorrow Challenges us to see religion les as an ideology and more as a tool kit a set of techniques perhaps an art form
