The Flow Of Art:

The Flow of Art Henry McBride, 1997-01-01 This volume presents a collection of writing by the foremost art critic of the modern movement as it emerged in the United States after the 1913 Armory Show McBride wrote for The New York Sun and the literary journal The Dial Flow of Art H. McBride, 1997 *In the Flow* Boris Groys, 2018-01-16 The leading art theorist takes on art in the age of the Internet In the early twentieth century art and its institutions came under critique from a new democratic and egalitarian spirit The notion of works of art as sacred objects was decried and subsequently they would be understood merely as things This meant an attack on realism as well as on the traditional preservative mission of the museum Acclaimed art theorist Boris Groys argues this led to the development of direct realism an art that would not produce objects but practices from performance art to relational aesthetics that would not survive But for more than a century now every advance in this direction has been quickly followed by new means of preserving art's distinction In this major new work Groys charts the paradoxes produced by this tension and explores art in the age of the thingless medium the Internet Groys claims that if the techniques of mechanical reproduction gave us objects without aura digital production generates aura without objects transforming all its materials into vanishing markers of the transitory present The Flow Brain State of Painting and Drawing Artists Ariana Van Heerden, 2014 The aim of this study was to investigate whether there is an association between art making and the brain state known as flow a construct defined by Mihaly Csikszentmihalyi Links were sought between artists' perceived propensity to experience flow and quantified experimental data of the same art making events A predominantly psychological theoretical framework had to be created contextual as well as conceptual of historical and contemporary leanings that have formulated understandings of creativity and flow These indicate that flow can trace its origins to concepts of human happiness and excellence motivation self determination and peak experiences These concepts illustrate that in pursuing intrinsic endeavours such as art making a person is continuously engaged in reflectivity and deliberation concerning his or her actions and aims which tend to be self motivated or autotelic In this study the autotelic and self reflecting leanings of art making were found to be germane to flow A key aspect for understanding the flow experience is Arne Dietrich's hypothesis of transient hypofrontality described as enabling the temporary suppression of the analytical and meta conscious capacities of the explicit system In this study transient hypofrontality was found to be germane to interpretations of flow and art making **Fire and Flow** Barrett Williams, ChatGPT, 2025-01-12 Dive into a mesmerizing world of artistry and passion with Fire and Flow a profound exploration of circus arts that ignites both imagination and skill Whether you're drawn to the hypnotic dance of flames or the seamless grace of flow arts this eBook is your ultimate guide Begin your journey with a captivating introduction to the realm of fire performance tracing its roots and cultural significance across the ages From ancient rituals to the dynamic practices of today discover how fire manipulation has evolved distinctly through geography and time Immerse yourself in the rhythmic dance of the flow arts where mindfulness intertwines with
