

BOOK REVIEW

THE FOREST SERVICE: A STUDY IN PUBLIC LAND MANAGEMENT. By Glen O. Robinson. Johns Hopkins University Press, 1975. Pp. xv, 337. \$16.95.

*Reviewed by A. Dan Tarlock**

The Forest Service is charged with managing our nation's public timber resources. To accomplish this, the agency must balance competing demands from industry for increased timber sales, from the recreation industry for more intense development of outdoor recreation areas, and from environmentalists for more wilderness and wildlife protection areas. This balancing is done through the statutory authority to classify public lands under its jurisdiction for various uses and to adopt management plans.¹ In this manner the Forest Service determines the allocation of a substantial part of our forest resources. This broad power has long been acknowledged, but until recently it has not been subjected to careful legal analysis, let alone judicial scrutiny. Heir to a long and proud tradition stemming from the progressive conservation era, the Service is the classic example of the expert management agency. It has developed a strong concept of non-political resource management in the public interest. This professionalism combined with the vagueness of the agency's organic legislation has helped to shield the Service from legal scrutiny.

Today the Forest Service no longer enjoys a broad immunity from criticism. In recent years the Service has become embroiled in a series of bitter environmental controversies over the use of the lands it manages. Decisions to allow ski resorts in scenic areas,² to harvest timber
