The Frontiers Of Secrecy Closed Government In Britain:

Secrecy and Open Government K. Robertson, 1999-03-07 Does the Labour Government's commitment to Freedom of Information mean the end of excessive secrecy in the UK Why has Britain finally decided to join the many other countries that enjoy a right to know This book places the current UK debate over open government in its political context Robertson argues that just as secrecy reflected the interests of the powerful so too does freedom of information This is a radical and challenging alternative to the conventional view that open government is concerned with empowering the people

Secrecy, Public Relations and the British Nuclear Debate Daniel Salisbury, 2020-02-06 This book constitutes an original archival history of government secrecy public relations and the debate surrounding nuclear weapons in Britain from 1970 to 1983 The book contrasts the secrecy and near silence of the Heath Wilson and Callaghan governments on nuclear issues in the 1970s with the increasingly vocal case made for the possession of nuclear weapons by the first Thatcher government following a shift in approach in 1980 This shift occurred against a background of rising Cold War tensions and a growing public nuclear debate in the UK The book seeks to contextualise and explain this transformation considering the role of party politics structures and personalities inside the government and external influences notably the role of investigative journalists and think tanks in cracking open official secrecy and demanding justification for Britain's possession of nuclear weapons and the peace movement in driving increasingly assertive public relations from 1980 The book draws on material from archives and interviews with key figures involved to provide an original and engaging account It argues that this process of opening up saw significant disclosure of nuclear policy for the first time and the most extensive public justification of the British nuclear capability to date which has shaped public understanding of British nuclear weapons into the twenty first century This book will be of much interest to students of British politics Cold War studies nuclear politics and security studies

Britain, America and Anti-Communist Propaganda 1945-53 Andrew Defty, 2013-12-02 In the Cold War battle for hearts and minds Britain was the first country to formulate a coordinated global response to communist propaganda In January 1948 the British government launched a new propaganda policy designed to oppose the inroads of communism by taking the offensive against it A small section in the Foreign Office the innocuously titled Information Research Department IRD was established to collate information on communist policy tactics and propaganda and coordinate the discreet dissemination of counter propaganda to opinion formers at home and abroad

The Frontiers of Secrecy David Leigh, 1982

Secrecy in Public Relations, Mediation and News Cultures Anne M. Cronin, 2023-01-19 This book investigates the relationship of secrecy as a social practice to contemporary media news cultures and public relations Drawing on Georg Simmel's theorisation of how secrecy produces a second world alongside the obvious world and creates and reshapes social relations Anne Cronin argues for close analysis of the PR industry as a powerful vector of secrecy and an examination of its relationship to news cultures Using case studies and in depth interviews as well as recent research in

media and cultural studies sociology journalism studies and communication studies the book analyses how PR practices generate a second shadow world of the media sphere which has a profound impact on the obvious world It interrogates both the PR industry s and news culture s role in shaping social relations for a digital media landscape and those initiatives promoting transparency of data and decision making processes An insightful interdisciplinary approach to debates on media and power this book will appeal to students of public relations sociology media studies cultural studies and communication studies It will also be of interest to scholars and practitioners working at the intersections of media social relations and public trust

The Silence of Constitutions (Routledge Revivals) Michael Foley, 2013-01-11 First published in 1989 Michael s Foley s book deals with the abeyances present in both written and unwritten constitutions arguing that these gaps in the explicitness of a constitution and the various ways they are preserved provide the means by which constitutional conflict is continually postponed Abeyances are valuable therefore not in spite of their obscurity but because of it

Theories of the Information Society Frank Webster, 2002 In the first edition of *Theories of the Information Society* Frank Webster set out to make sense of the information explosion taking a sceptical look at what thinkers mean when they refer to the information society and critically examining all the major post war theories and approaches to informational development

The United Nations and the Rationale for Collective Intelligence Bassey Ekpe, 2009 Taking as its central argument the question of whether an intelligence system is both desirable and feasible within the UN structure this study explores the complex and sometimes irreconcilable issues of strategic intelligence in a sharing context This study further identifies and develops both conceptual and empirical framework for a viable intelligence capability in multi agency institutions exploring and suggesting for the first time necessary and acceptable conditions for collective intelligence in an environment characterised by conflicting objectives among international actors It takes as its main premise the view that the United Nations and the world of intelligence are two separate and contradicting entities that conflict in both principles and operating doctrines From this point of view the author explores the many theoretical imperatives which set the two institutions apart and stand in the way of understanding the concepts He also goes further to examine the contexts in which the contradictions could be harmonised This book is one of a handful of studies it is highly original in that it focuses on the relationship between intelligence and the United Nations While previous efforts to examine the subject have approached it from a strictly practical point of view this work is clearly focused on the linkages between theory and practice The methodology is thoughtful and broad in scope and the work is theoretically well informed and sophisticated in its analysis of the subject matter The discussion of aspects of the theory of international relations specifically those relevant to the role of international governance and the examination of the working of the UN and several case studies of the UN in action are further characteristics of the rigor and clarity in which the author approaches the study in an intelligent and illuminating manner While the book s many contributions can be found at various levels of originality its thorough assessment of the linkage between theory and policy stands out perhaps as the

most important and primary contribution to the areas of collective intelligence and international relations Other important contributions include the case study analyses and specification of criteria for evaluating collective security intelligence mechanisms In essence a lack of scholarly efforts to ground the notion of collective intelligence within a rigorous intellectual framework is a significant vacuum in the study of intelligence which the present study has filled Scholars working within the international relations discipline and more specifically issues of global governance and security will find this study invaluable The book should also appeal to many categories of readers working in information and policy environment as well as governmental and non governmental organisations

The War Prerogative Rosara Joseph, 2013-09-26 This book studies the evolution of the war prerogative in England from 1600 2012 It traces the historical theory and practice of the war prerogative and proposes reform of the constitutional arrangements for its exercise It addresses three key questions First what have writers on political and constitutional theory said about the constitutional arrangements for the war prerogative and in particular what justifications have been advanced for those arrangements Secondly in practice has the executive in fact possessed sole and exclusive powers over war and the deployment of force or have Parliament and the courts had a role to play in their exercise and scrutiny Thirdly are there better ways to organise our constitutional arrangements for the war prerogative to enable a more substantive role for Parliament particularly the House of Commons in its exercise and scrutiny On the first question it is shown that orthodox theoretical and political discourses have continuously asserted the executive's exclusive power over war but the justifications advanced for that arrangement have changed over time Those changes reflect the varying influence of different political theories at different times On the second question it is found that contrary to orthodox theoretical and political discourses Parliament has played an active and substantive role in the exercise and scrutiny of the war prerogative The courts have refused to intervene in the exercise of the war prerogative but have been more ready to intervene in cases involving the exercise of powers incidental to the war prerogative On the third question it is argued that reform of the constitutional arrangements for the war prerogative is necessary and desirable The use of institutional mechanisms is recommended which are small scale rules and institutional arrangements within existing institutions which aim to promote certain normative goals In particular the enactment of a statute is proposed which would impose conditions on the executive's exercise of its war prerogative It is argued that these proposals show that through careful institutional design democratic values national security and operational efficiency can each be reconciled and promoted
