The Fundamental Difference:

Doctrine, Dynamic and Difference Pieter de Witte, 2012-03-29 One of the most divisive issues in Western Christianity since the Reformation is the question of how humans are justified by God In 1999 after many decades of ecumenical dialogue Lutherans and Roman Catholics have declared that this issue of justification by faith is no longer a cause of division between them One of the fascinating features of this Joint Declaration on the Doctrine of Justification JDDJ is that it expresses a differentiated consensus on justification The method of differentiated consensus is generally regarded as an important methodological step forward in the ecumenical dialogue It has been used and referred to in ecumenical documents published after 1999 But what are its meaning and implications This study attempts to clarify the method of differentiated consensus by 1 investigating the process of doctrinal rapprochement which led up to the JDDJ 2 examining the way the consensus takes shape in the document itself 3 analyzing arguments offered by critics and advocates of the official dialogue and 4 reflecting on the concept of doctrinal difference Whitehead's Metaphysics of Creativity Friedrich Rapp, Reiner Wiehl, 1990-01-01 Twelve papers presented at the International Whitehead Symposium October 1983 in Bad Homburg West Germany Topics include Whitehead's place in the history of philosophy the connection between empirical results and their metaphysical interpretation cosmological and anthropological dimensions and the relation between the philosophical and theological interpretations of creativity Paper edition unseen 16 95 Annotation copyrighted by Book News Inc Portland OR

Democracy Richard McGarvie, 1995-09-28 It is of vital importance to the future of Australia's democracy and federation that the right decision be made on the republic issue This is not a simple question of choosing between a monarchy and a republic between the Queen and an Australian head of state though that choice does need to be made But before Australians can make that choice they need a proper understanding of our present system and they must be offered a republic that preserves the quality of democracy of that system not one that would degrade it In Democracy Richard McGarvie explains the evolution of our system of government the safeguards provided by the roles of the governor general and state governors and why the reserve powers and the constitutional conventions are so important McGarvie's meticulous examination of the proposed models for a republic including the Turnbull model proposed in the November 1999 referendum question exposes the dangers in choosing the wrong republic He warns that the method of appointment and dismissal of the head of state are crucial to the maintenance of our democracy If Australia does choose to become a republic there is a safe way to proceed Democracy shows the way *An Inquiry Into the Teaching of Addition and Subtraction ...* Albert Duncan Yocum, 1901

Extraordinary Questions Allyn David Mcauley, 2010-09 These irreconcilable tensions derive from the same source from the failure of Western rationalism to erect a solid house on a solid foundation as it promised it would That is Western philosophy promised an elegant structure with the top floor comprised of the gracious rooms for human living the space where man lives happily with man because he understands the cosmic necessity of the moral truths he knows surely what he

and his fellow man should do to be fulfilled and happy in the most sublime sense of happiness The discovery by rational science that man is an historical and biological accident convinced the philosopher that moral truths must be relative to unsupported human choice and therefore that our moral certainty would have to be derived from the non scientific realm of faith the realm of religion and art the realm of the non rational Today the good news is that this problem is really almost academic as they say From the late nineteenth century through most of the twentieth the failure of Western rationalism created a great outpouring of thought and expression from thinkers artists scientists and ordinary intellectuals Even the great world wars were often understood in light of this issue Today all is quiet on the Western front The vacuum left by the failure of Western rationalism in regard to human morality seems to have been filled quite nicely by the Judeo Christian and Islamic religions and perhaps they always carried most of the burden for most of us anyway Only in the hallowed halls of our academies if there do earnest students and professors argue over the foundations of human thought and action Now that things are quiet and old controversies are largely ignored if not exactly laid to rest it might be enjoyable to start thinking again For when the entertainment is over and one is alone the mind turns to reflection In this collection of essays Allyn McAuley explores many of the largest themes in Western philosophy from a fresh perspective He believes that both primary branches of contemporary philosophy have lost the original animating spirit of Western thought and attributes this to their implicit acceptance of modern moral relativism Advocating a return to the naive questioning characteristic of our native intelligence the author examines popular views on such diverse issues as abortion ethics the Internet and human freedom extraterrestrial intelligence business theory and international human rights He moves from these topical reflections to offer thoughts on extraordinary questions that he believes are beyond the mastery of any philosopher yet demand the attention of all thinking men and women questions on the nature of truth beauty love happiness and the immortality of the human soul McAuley concludes with the contention that philosophy by itself is insufficient and that the scientific impulse must be supplemented by the artistic sensibility in order to yield true understanding and therefore happiness the goal of human life

Imagined Civilizations Roger Hart, 2013-08-15 Roger Hart debunks the long held belief that linear algebra developed independently in the West Accounts of the seventeenth century Jesuit Mission to China have often celebrated it as the great encounter of two civilizations The Jesuits portrayed themselves as wise men from the West who used mathematics and science in service of their mission Chinese literati official Xu Guangqi 1562 1633 who collaborated with the Italian Jesuit Matteo Ricci 1552 1610 to translate Euclid's Elements into Chinese reportedly recognized the superiority of Western mathematics and science and converted to Christianity Most narratives relegate Xu and the Chinese to subsidiary roles as the Jesuits translators followers and converts *Imagined Civilizations* tells the story from the Chinese point of view Using Chinese primary sources Roger Hart focuses in particular on Xu who was in a position of considerable power over Ricci The result is a perspective startlingly different from that found in previous studies Hart analyzes Chinese mathematical treatises

of the period revealing that Xu and his collaborators could not have believed their declaration of the superiority of Western mathematics Imagined Civilizations explains how Xu s West served as a crucial resource While the Jesuits claimed Xu as a convert he presented the Jesuits as men from afar who had traveled from the West to China to serve the emperor
