The Future Human Ecology And Education:

The Future: Human Ecology and Education Edward A. Sullivan, 1975 The Future of Sustainability Education at North American Universities Naomi Krogman, 2023-02-10 This collection explores sustainability education in the North American academy. The authors advocate for a more integrated approach to teaching sustainability in order to help students address the most pressing problems of the world, embrace experimentation, and foster more meaningful involvement with the communities in which universities are located. Throughout, they remain focussed on identifying opportunities for sustainability in higher education and suggesting specific strategies and tactics to achieve them. Recommendations include pedagogical and structural changes aimed at helping students understand the systems in which they can advance sustainability. This timely volume will be of interest to scholars, academic leaders, policy makers, societal partners in research, and private sector leaders interested in advancing the sustainability agenda. Foreword by Thomas E. Lovejoy. Contributors: Apryl Bergstrom, Christopher G. Boone, Ann Dale, Thomas Dietz, Roger Epp, Allison F. W. Goebel, Kourosh Houshmand, Robert H. Jones, Naomi Krogman, Shirley M. Malcom, Robert E. Megginson, Patricia E. Ellie Perkins, Vicky J. Sharpe, Toddi A. Steelman. **The Future of Medical Education** William G. Anlyan, 1973-04-19 The major recommendations and chapters of *The Future of Moral Education* can be divided into three categories: expansion of medical education's scope and responsibilities; basic conditions for progress in medical education; and medical education and the nation's health. The contributors all recognize their obligation to medical education's future as a societal endeavor to serve the nation's health needs. **The Future of American Higher Education** Joseph L. DeVitis, 2023-07-03 This impressive anthology presents the reader with an introduction to a gallery of public intellectuals through the critical eyes of a wide array of contributing writers from various academic fields. Both the latter and the public intellectuals themselves are responding to the state of American higher education. Importantly, most of them are a few public intellectuals in the book who cling closer to the status quo, do not separate colleges and universities from the political, economic, and social currents of American society. They attack the realities of growing social inequality, the intractable presence of institutional racism, and the recurrent reliance on the free market as the arbiter of value. Public intellectuals assess the impact of these social factors on the organization and practices of contemporary American higher education. They force the reader to consider serious challenges to the current arrangement of higher learning and, as such, they ask us to assess the efficacy of their respective perspectives. Do they present the reader with insight or idealism, pathways or dead ends? This compendium provides an abundance of ideas for higher education leaders, policy makers, faculty members, trustees, and governmental officials, as well as social theorists and graduate students interested in higher education careers. Richard Guarasci, President Emeritus of Wagner College. Just as our society is polarized, higher education is no less divided as to its mission and purpose: whether it should be preparing students for employment or for engagement as citizens; whether it should be corporatist and profit-driven or promote intellectual curiosity and

independent thinking and whether it should pursue a neoliberal agenda or promote a liberal education Whose scholarship culture and epistemologies should be validated Should it be a private or a public good Preserve tenure or erode it What role should colleges and universities play in addressing economic inequality and systemic racism The answers to these questions are critical for the future of our society as our universities and colleges are the nurseries of the values and philosophies that shape it The chapters in this book review the contributions of seventeen public intellectuals who have been at the forefront of these issues and significantly contributed to these debates Each describes the genesis of each scholar's ideas and presents and critiques his or her core insights and arguments The seventeen public intellectuals represent a spectrum of opinion from the conservative to the progressive At this pivotal moment when much of higher education is in economic crisis and public trust in it has been eroded this book offers a robust entry point for considering the options and directions ahead for anyone in a leadership position The book will also be valuable for higher education courses to stimulate debate about these critical issues and introduce readers to the seminal thinkers in the field Public Intellectuals Presented Stanley Aronowitz Michael B.
