The Ganges:

The Ganges in Myth and History Steven G. Darian, 2001-01-01 No river has kindled Man's imagination like the Ganges. From its icy origins high in the Himalayas this sacred river flows through the holy cities and the great plains of northern India to the Bay of Bengal. In a country where the red heat of summer inspires prayer for the coming monsoon, the life-giving waters of the Ganges have assumed legendary powers in the form of the Hindu goddess Ganga, the source of creation and abundance. Pilgrims flock to her shores to cleanse and purify themselves, to cure ailments and to die that much closer to paradise. Steven Darian writes of the human experience and the legendary myths that surround the Ganges. While collecting material for this book, Dr. Darian lived by the Ganges, explored her shores, and was a pilgrim to the Ganga Sagar festival at Sagar Island off Calcutta where the sacred river and the ocean merge. *The Ganges* Raghubir Singh, 1992. Noted photographer Singh makes a personal pilgrimage along the Ganges from the Himalayas where the river arises among snows through the villages of the Gangetic Plain past Banarès through Bihar to the Bay of Bengal. Along the way he captures the river in many stages and captures also the lives. **"A" Dictionary of the Bengalee Language** William Carey, 1818. A Dictionary, Bengali and Samskrit, Explained in English, and Adepted for Students of Either Language; to Which is Added an Index Serving as a Reserved Dictionary Graves-Chamney Haughton (Sir), 1833. **Banaras** Diana L. Eck, 2013-06-05 The sacred city of Banaras on the River Ganges is one of the oldest living cities in the world as old as Jerusalem, Athens, and Peking. It is the place where Shiva, the Lord of All, is said to have made his permanent home since the dawn of creation. There are few cities in India as traditionally Hindu and as symbolic of the whole of Hindu culture as Banaras. In this eloquent, finely observed study, Diana Eck shows how the city over the centuries has become a lens through which the Hindu vision of the world is precisely focused. She reveals the spiritual and historical resonance of this holy place where great sages such as the Buddha and Shankara were taught, where ashrams, palaces, and universities were built, where God has been imagined and imagined in a thousand ways. She describes the rites of its temples, the busy life of its riverfront, and the exuberance of its festivals. She tells how people travel from all over India to Banaras for the privilege of dying a good death here, for they believe that on the banks of the River Ganges, where the atmosphere of devotion is improbable in its strength, it is possible to be released from the earthly round forever. In her account of the sacred history, geography, and art of the city, its elaborate and thriving rituals, its myths, and literature, and its importance to pilgrims and seekers, Diana Eck uses her wealth of scholarship to make the Hindu tradition come powerfully alive so that we come to understand the meaning of this sacred city to the millions of believers who have been coming here for over 2,500 years. *A Dictionary of the Bengala Language* William Carey, 1825. *The Ecology, Exploitation and Conservation of River Turtles* Don Moll, Edward O. Moll, 2004-04-08. The underlying theme of this book is that a widespread taxonomically diverse group of animals, important both from ecological and human resource perspectives, remains poorly understood and in decline while receiving scant attention from

the ecological and conservation community This volume proposes a comprehensive overview of the world's river turtles ecology conservation and management It begins with a categorization of taxa which inhabit flowing water habitats followed by information on their evolutionary and physical diversity and biogeography Within the framework of ecology the authors discuss the composition of river turtle communities in different types of lotic habitats and regions population dynamics movements reproductive characteristics and behavior predators and feeding relationships In a conservation and management section the authors identify and evaluate the nature and intensity of factors which threaten river turtle survival almost all of which involve direct human exploitation or indirect effects of human induced habitat alteration and degradation They then list and evaluate the various schemes which have been proposed or employed to halt declines and restore populations and make recommendations for future management plans for specific species and regions In closing they state their viewpoint concerning future research directions and priorities and an evaluation of future prospects for survival of the world's river turtle species
