Survey Research in the United States Jean M. Converse, 2017-07-05 Hardly an American today escapes being polled or surveyed or sampled In this illuminating history Jean Converse shows how survey research came to be perhaps the single most important development in twentieth century social science Everyone interested in survey methods and public opinion including social scientists in many fields will find this volume a major resource Converse traces the beginnings of survey research in the practical worlds of politics and business where elite groups sought information so as to influence mass democratic publics and markets During the Depression and World War II the federal government played a major role in developing surveys on a national scale In the 1940s certain key individuals with academic connections and experience in polling business or government research brought surveys into academic life By the 1960s what was initially viewed with suspicion had achieved a measure of scientific acceptance of survey research The author draws upon a wealth of material in archives interviews and published work to trace the origins of the early organizations the Bureau of Applied Social Research the National Opinion Research Center and the Survey Research Center of Michigan and to capture the perspectives of front line figures such as Paul Lazarsfeld George Gallup Elmo Roper and Rensis Likert She writes with sensitivity and style revealing how academic survey research along with its commercial and political cousins came of age in the United States

The International History of Communication Study Peter Simonson, David W. Park, 2015-10-14 The International History of Communication Study maps the growth of media and communication studies around the world Drawing out transnational flows of ideas institutions publications and people it offers the most comprehensive picture to date of the global history of communication research and education This volume reaches into national and regional areas that have not received much attention in the scholarship until now including Asia Latin America Africa and the Middle East alongside Europe and North America It also covers communication study outside of academic settings in international organizations like UNESCO and among commercial and civic groups It moves beyond the traditional canon to cover work by forgotten figures including women scholars in the field and those outside of the United States and Europe and it situates them all within the broader geopolitical institutional and intellectual landscapes that have shaped communication study globally Intended for scholars and graduate students in communication media studies and journalism this volume pushes the history of communication study in new directions by taking an aggressively international and comparative perspective on the historiography of the field Methodologically and conceptually the volume breaks new ground in bringing comparative transnational and global frames to bear and puts under the spotlight what has heretofore only lingered in the penumbra of the history of communication study

Samuel Stouffer and the GI Survey Joseph W. Ryan, 2013-11-01 Samuel Stouffer a little known sociologist from Sac City Iowa is likely not a name World War II historians associate with other stalwart men of the war such as Eisenhower

Patton or MacArthur Yet Stouffer in his role as head of the Army Information and Education Division's Research Branch spearheaded an effort to understand the citizen soldier his reasons for fighting and his overall Army experience Using empirical methods of inquiry to transform general assumptions about leadership and soldiering into a sociological understanding of a draftee Army Stouffer perhaps did more for the everyday soldier than any general officer could have hoped to accomplish Stouffer and his colleagues surveyed more than a half million American GIs during World War II asking questions about everything from promotions and rations to combat motivation and beliefs about the enemy Soldiers answers often demonstrated that their opinions differed greatly from what their senior leaders thought soldier opinions were or should be Stouffer and his team of sociologists published monthly reports entitled What the Soldier Thinks and after the war compiled the Research Branch's exhaustive data into an indispensable study popularly referred to as The American Soldier General George C Marshall was one of the first to recognize the value of Stouffer's work referring to The American Soldier as the first quantitative studies of the mental and emotional life of the soldier Marshall also recognized the considerable value of The American Soldier beyond the military Stouffer's wartime work influenced multiple facets of policy including demobilization and the GI Bill Post war Stouffer's techniques in survey research set the state of the art in the civilian world as well Both a biography of Samuel Stouffer and a study of the Research Branch Samuel Stouffer and the GI Survey illuminates the role that sociology played in understanding the American draftee Army of the Second World War Joseph W Ryan tracks Stouffer's career as he guided the Army leadership toward a more accurate knowledge of their citizen soldiers while simultaneously establishing the parameters of modern survey research David R Segal's introduction places Stouffer among the elite sociologists of his day and discusses his lasting impact on the field Stouffer and his team changed how Americans think about war and how citizen soldiers were treated during wartime Samuel Stouffer and the GI Survey brings a contemporary perspective to these significant contributions
