Tales of Two Cities Camilla Townsend, 2022-02-24 Parallel histories of workers in two port cities Baltimore and Guayaquil illustrate divergent paths in the development of the Americas The United States and the countries of Latin America were all colonized by Europeans yet in terms of economic development the U S far outstripped Latin America beginning in the nineteenth century Observers have often tried to account for this disparity many of them claiming that differences in cultural attitudes toward work explain the US s greater prosperity In this innovative study however Camilla Townsend challenges the traditional view that North Americans succeeded because of the so called Protestant work ethic and argues instead that they prospered relative to South Americans because of differences in attitudes towards workers that evolved in the colonial era Townsend builds her study around workers lives in two similar port cities in the 1820s and 1830s Through the eyes of the young Frederick Douglass in Baltimore Maryland and an Indian girl named Ana Yagual in Guayaquil Ecuador she shows how differing attitudes toward race and class in North and South America affected local ways of doing business This empirical research clarifies the significant relationship between economic culture and racial identity and its long term effects

Sudarshan, 2024-10-16 This book is an expansive outline of history which at the same time is also a very comprehensive history of the Sri Vaishnava community of Tamil Nadu India It spans a period of 1000 years from the 11th century CE to the present day It is The historical narrative is woven around a tale of two cities i e Sri Rangam and Kanchipuram the two towns in South India from where a titanic struggle for ownership power legitimacy and control over not only temples but also for the very self identity of the Sri Vaishnava identity was waged for over seven centuries by two major sects the Tenkalais and Vadakalais The struggle continues to this day having been dragged deeply into and getting increasingly embroiled in the larger issues and dynamics of the Tamil State socio politics viz language ethnology demography and culture The tale of two cities is a historical narrative about grievous loss of religious legacy debility of cultural identity and decline of economic prosperity arising from social alienation This book is an absorbing tale of human frailties of ambition greed deceit envy malice and betrayal [David Copperfield. Duchan, Gail A. Bruder, Lynne E. Hewitt, 2012-12-06 This volume describes the theoretical and empirical results of a seven year collaborative effort of cognitive scientists to develop a computational model for narrative understanding Disciplines represented include

artificial intelligence cognitive psychology communicative disorders education English geography linguistics and philosophy

The book argues for an organized representational system a Deictic Center DC which is constructed by readers from language in a text combined with their world knowledge As readers approach a new text they need to gather and maintain information about who the participants are and where and when the events take place This information plays a central role in understanding the narrative The editors claim that readers maintain this information without explicit textual reminders by including it in their mental model of the story world Because of the centrality of the temporal spatial and character information in narratives they developed their notion of a DC as a crucial part of the reader s mental model of the narrative The events that carry the temporal and spatial core of the narrative are linguistically and conceptually constrained according to certain principles that can be relatively well defined A narrative obviously unfolds one word or one sentence at a time This volume suggests that cognitively a narrative usually unfolds one place and time at a time This spatio temporal location functions as part of the DC of the narrative It is the here and now of the reader s mind s eye in the world of the story

Organized into seven parts this book describes the goal of the cognitive science project resulting in this volume the methodological approaches taken and the history of the collaborative effort It provides a historical and theoretical background underlying the DC theory including discussions of deixis in language and the nature of fiction It goes on to outline the computational framework and how it is used to represent deixis in narrative and details the linguistic devices implicated in the DC theory Other subjects covered include crosslinguistic indicators of subjectivity psychological investigations of the use of deixis by children and adults as they process narratives conversation direction giving implications for emerging literacy and a narrator s experience in writing a short story
