Tropical Tales, and Others Dolf Wyllarde, 1910 *Tales of Tropical Plant Diseases in an Age of Climate Change* Khoon Chin, 2025-05-24 This book offers a global perspective on major tropical crops exploring their role in food production and the threats plant diseases pose to their productivity Drawing from the author's diverse experiences as a plant pathologist across Asia Europe the US and Latin America as well as his work as an independent research consultant on complexity science the book offers both professional insights and personal reflections Narratives have long been a powerful tool for human communication often more knowledge dense than any other form of exchange The use of stories in this book serves three main purposes First complexity theory suggests that reflecting on others' stories can inspire scientists to form fresh perspectives and unique insights based on their own knowledge and experiences This process may even help people know what they didn't know they knew a concept popular in knowledge management circles Complexity practice takes this further by helping scientists uncover what they didn't know they didn't know a crucial element for advancing research rather than simply investigation Second today's students often report learning more from the personal experiences of their teachers than from mere facts Traditional encyclopedic texts leave little room for the self-learning practices that are central to modern education Stories by contrast are an effective way of conveying experiential or tacit knowledge which is often more valuable in real world contexts Additionally the use of narratives and visuals makes phytopathology more accessible for broader audience interested in sustainability biodiversity food security biosecurity regenerative agriculture resilience climate change new technologies and public policy The final chapter ties the book together by focusing on sustainability and ecosystem services for the future It also provides an extensively researched library of references on the management of tropical crop diseases offering quick access to essential facts in the appendices

Imperialism and the natural world John M. MacKenzie, 2017-03-01 Imperial power both formal and informal and research in the natural sciences were closely dependent in the nineteenth century This book examines a portion of the mass produced juvenile literature focusing on the cluster of ideas connected with Britain's role in the maintenance of order and the spread of civilization It discusses the political economy of Western ecological systems and the consequences of their extension to the colonial periphery particularly in forms of forest conservation Progress and consumerism were major constituents of the consensus that helped stabilise the late Victorian society but consumerism only works if it can deliver the goods From 1842 onwards almost all major episodes of coordinated popular resistance to colonial rule in India were preceded by phases of vigorous resistance to colonial forest control By the late 1840s a limited number of professional positions were available for geologists in British imperial service but imperial geology had a longer pedigree Modern imperialism or municipal imperialism offers a broader framework for understanding the origins long duration and persistent support for overseas expansion which transcended the rise and fall of cabinets or international realignments in the 1800s Although medical scientists began to discern and control the microbiological causes of tropical ills after the mid nineteenth century the claims for climatic causation did not undergo a corresponding decline Arthur Pearson's Pearson's Magazine was patriotic militaristic and devoted to royalty The book explores how science emerged as an important feature of the development policies of the Colonial Office CO of the colonial empire

 Shadows of the Tropics* James S. Duncan, 2016-05-23 In this original work James Duncan explores the transformation of
 Ceylon during the mid nineteenth century into one of the most important coffee growing regions of the world and
 investigates the consequent ecological disaster which erased coffee from the island Using this fascinating case study by way
 of illustration *In the Shadows of the Tropics* reveals the spatial unevenness and fragmentation of modernity through a focus
 on modern governmentality and biopower It argues that the practices of colonial power and the differences that race and
 tropical climates were thought to make were central to the working out of modern governmental rationalities In this context
 the usefulness of Foucault's notions of biopower discipline and governmentality are examined The work contributes an
 important rural focus to current work on studies of governmentality in geography and offers a welcome non state dimension
 by considering the role of the plantation economy and individual capitalists in the lives and deaths of labourers the
 destabilization of subsistence farming and the aggressive re territorialization of populations from India to Ceylon *The

 Cheryll J. Williams, 2021-12 Rare unique and irreplaceable precious native rainforests occupy a precariously small part of
 Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem
 Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as
 both food and medicine *Phytochemistry of Australia's Tropical Rainforest* is a record of this history and details how our
 understanding of these plants has led to the discovery of anaesthetics analgesics steroids antimalarials and more It provides
 an insight into the habitat ecology and family associations of hundreds of species and explores their future therapeutic
 potential alongside phytochemical studies of the ancient plant lineages Toxicological evaluations of important poisonous
 plants are also included Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on
 Earth many of which are illustrated in this book This comprehensive work is an essential reference for phytochemists
