Tales For Travellers Vol 4 Tales For Travellers:

Tales of a Traveler Washington Irving, 1894 *True Tales of a Traveller 20: The Way of the Shoestring Outdoor Photographer* Alix Lee, The 20th book in the True Tales of a Traveller series *Way of the Shoestring Outdoor Photographer* is a very difficult book to categorize Basically it s a travel story but it s a travel story with a lot more than just travel in it travel and the outdoor life geography and history ethnic conflict and racism international relations and political power family hopes and expectations psychology and mental health it even has a ghost story or perhaps two hidden away within it Any one of these aspects of the story would be worthy of tackling alone as the subject of an entire book For example the ghost story is something that I reflected upon often in the months and years after it happened I couldn t come to any definite conclusions on this so I ll leave this part for readers to decide for themselves Ethnic conflict and racism within the travel experience context are things I ve written about before particularly in the book *Overlanding* and here as in that book this is not limited to academic research although it does include some of that but also includes first hand experience As for psychology and mental health my own downward slide into depression the way it happened the factors initially preventing it from happening and how I came back out of it could well be subjects of interest in their own right to mental health professionals for example I was tempted to write more on this subject but originally I wanted to make this a short story of moderate length All of the above may lead the reader to imagine that this story is somewhat dry and lacking in humour but that s not the case at all And the best thing about it is that it s all true But more than anything else this is a story about photography as the title implies

more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge. In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries, this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time.
