Tales Of The Human Dawn:

Understanding Climate's Influence on Human Evolution National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on the Earth System Context for Hominin Evolution, 2010-04-17

The hominin fossil record documents a history of critical evolutionary events that have ultimately shaped and defined what it means to be human including the origins of bipedalism the emergence of our genus *Homo* the first use of stone tools increases in brain size and the emergence of *Homo sapiens* tools and culture The Earth's geological record suggests that some evolutionary events were coincident with substantial changes in African and Eurasian climate raising the possibility that critical junctures in human evolution and behavioral development may have been affected by the environmental characteristics of the areas where hominins evolved *Understanding Climate's Change on Human Evolution* explores the opportunities of using scientific research to improve our understanding of how climate may have helped shape our species Improved climate records for specific regions will be required before it is possible to evaluate how critical resources for hominins especially water and vegetation would have been distributed on the landscape during key intervals of hominin history Existing records contain substantial temporal gaps The book's initiatives are presented in two major research themes first determining the impacts of climate change and climate variability on human evolution and dispersal and second integrating climate modeling environmental records and biotic responses *Understanding Climate's Change on Human Evolution* suggests a new scientific program for international climate and human evolution studies that involve an exploration initiative to locate new fossil sites and to broaden the geographic and temporal sampling of the fossil and archeological record a comprehensive and integrative scientific drilling program in lakes lake bed outcrops and ocean basins surrounding the regions where hominins evolved and a major investment in climate modeling experiments for key time intervals and regions that are critical to understanding human evolution

New York Magazine, 1990-04-02 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea

[The Story of the Human Body](#) Daniel Lieberman, 2013-10-01 In this landmark book of popular science Daniel E Lieberman chair of the department of human evolutionary biology at Harvard University and a leader in the field gives us a lucid and engaging account of how the human body evolved over millions of years even as it shows how the increasing disparity between the jumble of adaptations in our Stone Age bodies and advancements in the modern world is occasioning this paradox greater longevity but increased chronic disease *The Story of the Human Body* brilliantly illuminates as never before the major transformations that contributed key adaptations to the body the rise of bipedalism the shift to a non fruit based diet the advent of hunting and gathering leading

to our superlative endurance athleticism the development of a very large brain and the incipience of cultural proficiencies Lieberman also elucidates how cultural evolution differs from biological evolution and how our bodies were further transformed during the Agricultural and Industrial Revolutions While these ongoing changes have brought about many benefits they have also created conditions to which our bodies are not entirely adapted Lieberman argues resulting in the growing incidence of obesity and new but avoidable diseases such as type 2 diabetes Lieberman proposes that many of these chronic illnesses persist and in some cases are intensifying because of dysevolution a pernicious dynamic whereby only the symptoms rather than the causes of these maladies are treated And finally provocatively he advocates the use of evolutionary information to help nudge push and sometimes even compel us to create a more salubrious environment With charts and line drawings throughout

Prehistoric Humans in Film and Television Michael Klossner, 2015-01-09 From the early days of the movies cavemen have been a popular subject for filmmakers not surprisingly since the birth of cinema occurred only a few decades after the earliest scientific studies of prehistoric man Filmmakers however were not constrained by the emerging science instead they most often took a comedic look at prehistory a trend that continued throughout the 20th century Prehistoric humans also populated adventure fantasy films with the original One Million B C 1940 leading the charge Documentaries were also made but it was not until the 1970s that accurate film accounts of prehistoric humans finally emerged This exhaustive work provides detailed accounts of 581 film and television productions that feature depictions of human prehistory Included are dramas and comedies set in human prehistory documentaries and films and television shows in which prehistoric people somehow exist in historical periods from the advent of civilization up to the present or in extraterrestrial settings Each entry includes full filmographic data including year of release running time production personnel cast information and format A description of each film provides background on the prehistoric elements Contemporary critical commentary is included for many of the works
