The Oxford Handbook of Ritual Language David Tavárez, 2024-11-14 This volume brings together representative case studies and surveys that explore research into ritual language covering theoretical and methodological approaches that reflect traditional inquiries and more recent studies This recent literature contends that ritual language hinges on the construction of authoritative ontological models about the cosmos and its inhabitants Ritual speech also orchestrates performances that articulate representations of collective identities and rests on the diversity of hierarchical forms of authoritative knowledge displayed in both oblique and direct terms Moreover performances texts and narratives associated with ritual practices are closely entwined with historical accounts that navigate current memories recast in a diversity of ways about ancestral beings and distant or recent pasts or

delimit a terrain in which dialectical relationships with colonial hegemony and Christian indoctrination emerge to transform the social order. Ritual narrative often offers in its structure and delivery momentous representation of the social order, social institutions, social difference and collective identities and may also be constituted by claims about relations among species, non-human actors and material culture. The Oxford Handbook of Ritual Language addresses foundational questions regarding the scope, structuring, use and consequences of ritual language. The chapters examine the relationship between speakers' consciousness and verbal ritual performances and between ritual language hegemony, collective authority and the social world. As the study of ritual speech hinges on extensive analyses of linguistic choices and styles, the contributors draw on data from a wide range of language groups and societies in the Americas, the Middle East, the Pacific, South Asia and the Indian Ocean.

Teaching Social Justice Using Postcolonial Texts Geraldine Balzer, Teresa Strong-Wilson, Anne Burke, 2023-07-28. This book explores how teachers can re-examine their emotional investments in enacting dominant settler values through changing their text selection and teaching practices. Based on a longitudinal qualitative research study conducted by a national team of literacy scholars in collaboration with practicing literacy teachers at eight sites across Canada, the book investigates how groups of teachers working collaboratively in inquiry groups develop and implement curriculum to promote their own and their students' understandings of social justice in postcolonial and settler spaces. In particular, the book highlights the rich and dynamic landscape of postcolonial authors, illustrators and texts, the development of culturally sensitive curricula and critical pedagogies possible in addressing contemporary and historical issues, both local and global. This book is primarily of interest to literacy scholars, literacy instructors, teacher educators in teacher education programs, educational leaders, practicing teachers from the K-12 spectrum and school district staff and policy makers with responsibilities for or interests in the potential of literacy and literature engagement for social justice education. The book is also of interest to postsecondary educators and teacher educators wishing to use literature in social justice, anti-racist and anti-oppressive courses.

The Reform Advocate, 1910. **Distributed Creativity** Eric F. Clarke, Mark Doffman, 2017. Creative practice in music, particularly in traditional concert culture, is commonly understood in terms of a rather stark division of labour between composer and performer. But this overlooks the distributed and interactive nature of the creative processes on which so much contemporary music depends. The incorporation of two features, improvisation and collaboration, into much contemporary music suggests that the received view of the relationship between composition and performance requires reassessment. Improvisation and collaborative working practices blur the composition

performance divide and in doing so provide important new perspectives on the forms of distributed creativity that play a central part in much contemporary music Distributed Creativity Collaboration and Improvisation in Contemporary Music explores the different ways in which collaboration and improvisation enable and constrain creative processes Thirteen chapters and twelve shorter Interventions offer a range of perspectives on distributed creativity in music on composer performer collaborations and on contemporary improvisation practices The chapters provide substantial discussions of a variety of conceptual frameworks and particular projects while the Interventions present more informal contributions from a variety of practitioners performers composers improvisers giving insights into the pleasures and perils of working creatively in collaborative and improvised ways
