Talk To The Mirror:

How Can I Talk If My Lips Don't Move? Tito Rajarshi Mukhopadhyay, 2011-04-01 An astounding new work by the author of *The Mind Tree* that offers a rare insight into the autistic mind and how it thinks sees and reacts to the world When he was three years old Tito was diagnosed as severely autistic but his remarkable mother Soma determined that he would overcome the problem by teaching him to read and write The result was that between the ages of eight and eleven he wrote stories and poems of exquisite beauty which Dr Oliver Sacks called amazing and shocking Their eloquence gave lie to all our assumptions about autism Here Tito goes even further and writes of how the autistic mind works how it views the outside world and the normal people he deals with daily how he tells his stories to the mirror and hears stories back how sounds become colors how beauty fills his mind and heart With this work Tito whom Portia Iversen co founder of Cure Autism Now has described as a window into autism such as the world has never seen gives the world a beacon of hope For if he can do it why can't others Brave bold and deeply felt this book shows that much we might have believed about autism can be wrong Boston Globe *Talking Movies* James Ross Cameron, 1927 Encyclopædia Britannica: or, A dictionary of arts and sciences, compiled by a society of gentlemen in Scotland [ed. by W. Franks, Jonathan H. Turner, 2012-07-09 Until recently a handbook on neurosociology would have been viewed with skepticism by sociologists who

have long been protective of their disciplinary domain against perceived encroachment by biology But a number of developments in the last decade or so have made sociologists more receptive to biological factors in sociology and social psychology Much of this has been encouraged by the coeditors of this volume David Franks and Jonathan Turner This new interest has been increased by the explosion of research in neuroscience on brain functioning and brain environment interaction via new MRI technologies with implications for social and psychological functioning This handbook emphasizes the integration of perspectives within sociology as well as between fields in social neuroscience For example Franks represents a social constructionist position following from G H Mead s voluntaristic theory of the act while Turner is more social structural and positivistic Furthermore this handbook not only contains contributions from sociologists but leading figures from the psychological perspective of social neuroscience

This perspective is essential for students, researchers, and practitioners to gain a complete understanding of how this fundamental skill develops in humans. The book is invaluable for academic researchers and advanced students in developmental psychology, education, social psychology, cognitive psychology, and the social sciences, as well as practicing psychologists, counselors, and psychiatrists, particularly those who deal with disorders involving social and/or communicative deficits.
