Observations are coupled with thought about things such as

- 1 whether the altered behavior usually explained as saving face or covering up weakness is not more like improvisation that retrospectively makes melodic sense of what would be wrong notes by offsetting or dream style logic that ever present keeps the flow from breaking
- 2 Cats or some cats may avoid trauma from bad experiences by convincing themselves it was only a nightmare and continuing to hope until they can cope
- 3 Cats demonstrate their social nature by showing off their catches sleeping together in the cold and behaving themselves but most are unfortunately like so called feral children because they are separated from their family while too young to have socialized they re enforce the stereotype of the independent asocial cat

One can only understand felinity by living with generations of cats under one roof
