Abstract

Neuro-aesthetics is a new scientific field in the field of research on the perception of beauty as well as the creation of art. This science deals with the connection between areas of the human brain and nervous systems with the perception of beauty. Neuro-aesthetic researchers and theorists consider the perception of beauty to have a biological basis. Aesthetics refers to the knowledge of how the senses are used to know. The purpose of writing this article is to review and introduce Don DeLillo's view on art and Aesthetics in the book *Mao II* and to extend the references in aesthetic education. This research is trying to determine the scope of this science and to express the challenges that are on this claim. The result of this research, which was carried out by examining the results of neuro-aesthetic tests and criticisms and opinions of theorists, shows that artistic perception is not mere visual perception, but variables such as historical, cultural factors, and conceptual understanding of the work are influential in artistic understanding.

Keywords: neuro-aesthetics; aesthetic experience; cultural memory; *Mao II*; perception process.

Resumo

A neuroestética é um novo campo científico dentro das pesquisas sobre a percepção da beleza e a criação artística. Esta ciência trata da conexão entre a percepção da beleza e algumas áreas do cérebro humano e do sistema nervoso. Pesquisadores e teóricos da neuroestética consideram que a percepção da beleza tem uma base biológica. A estética refere-se ao conhecimento da maneira em que os sentidos são usados para alcançar saberes. O objetivo deste artigo consiste em apresentar a visão de Don DeLillo sobre arte e estética no livro *Mao II* e dele extrair as referências ligadas à educação estética. Esta pesquisa está tentando determinar o alcance desta ciência e determinar os desafios dela procedentes. As conclusões da pesquisa, realizada a partir da análise de resultados de testes neuroestéticos e com base nas críticas e opiniões de diversos teóricos, mostram que a percepção artística não constitui uma mera percepção visual. De fato, variáveis como fatores históricos e culturais, assim como o entendimento conceitual das obras, têm óbvia influência sobre a compreensão artística.

Palavras-chave: neuro-estética; experiência estética; memória cultural; *Mao II*; processo de percepção.

The Forces Of Art Cultural Memory In The Present

Patricia Cook

The Forces Of Art Cultural Memory In The Present:

Religion and Cultural Memory Jan Assmann, Rodney Livingstone, 2006 In ten brilliant essays Jan Assmann explores the connections between religion culture and memory Building on Maurice Halbwachs's idea that memory like language is a social phenomenon as well as an individual one he argues that memory has a cultural dimension too He develops a persuasive view of the life of the past in such surface phenomena as codes religious rites and festivals and canonical texts on the one hand and in the Freudian psychodrama of repressing and resurrecting the past on the other Whereas the current fad for oral history inevitably focuses on the actual memories of the last century or so Assmann presents a commanding view of culture extending over five thousand years He focuses on cultural memory from the Egyptians Babylonians and the Osage Indians down to recent controversies about memorializing the Holocaust in Germany and the role of memory in the current disputes between Israelis and Palestinians in the Middle East and between Protestants and Catholics in Northern Ireland

Performing Memory in Art and Popular Culture Liedeke Plate, Anneke Smelik, 2013-04-02 This volume pursues a new line of research in cultural memory studies by understanding memory as a performative act in art and popular culture The authors take their cue from the observation that art and popular culture enact memory and generate processes of memory They do memory and in this doing of memory new questions about the cultural dimensions of memory arise How do art objects and artistic practices perform the past in the present What is their relationship to the archive Does the past speak in the performed past or do we speak to it To what purpose do objects recall And for whom do they recollect Here authors combine a methodological focus on memory as performance with a theoretical focus on art and popular culture as practices of remembrance The essays in the book thus analyze what is at stake in the complex processes of remembering and forgetting of recollecting and disremembering of amnesia and anamnesis that make up cultural memory

Materializing Memory in Art and Popular Culture Laszlo Muntean, Liedeke Plate, Anneke Smelik, 2016-12-08 Memory matters It matters because memory brings the past into the present and opens it up to the future But it also matters literally because memory is mediated materially Materiality is the stuff of memory Meaningful objects that we love or hate function not only as aide mmoire but are integral to memory Drawing on previous scholarship on the interrelation of memory and materiality this book applies recent theories of new materialism to explore the material dimension of memory in art and popular culture The book's underlying premise is twofold on the one hand memory is performed mediated and stored through the material world that surrounds us on the other hand inanimate objects and things also have agency on their own which affects practices of memory as well as forgetting Chapters 1 4 and 5 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3.0 license

Deleuzian Concepts Paul Patton, 2010-05-19 Patton s book is an important and innovative contribution to Deleuze studies and to contemporary debates in philosophy and the humanities His arguments are convincing and stimulating they open the way for a new and sober reading of Deleuze and bring him into dialogue with the tradition of political liberalism and pragmatism His use of the concept of the event to understand the history of colonization gives the reader a compelling example of what the political function of philosophy is or could be Paola Marrati The Johns Hopkins University Book Jacket

Philosophical Imagination and Cultural Memory Patricia Cook, 1993 Does philosophy have a future Postmodern thought with its rejection of claims to absolute truth or moral objectivity would seem to put the philosophical enterprise in jeopardy In this volume some of today s most influential thinkers face the question of philosophy s future and find an answer in its past Their efforts show how historical traditions are currently being

appropriated by philosophy how some of the most provocative questions confronted by philosophers are given their impetus and direction by cultural memory Unlike analytic philosophy a discipline supposedly liberated from any manifestation of cultural memory the movement represented by these essays demonstrates how the inquiries narratives traditions and events of our cultural past can mediate some of the most interesting exercises of the present day philosophical imagination Attesting to the power of historical tradition to enhance and redirect the prospects of philosophy these essays exemplify a new mode of doing philosophy The product of a National Endowment for the Humanities Summer Institute in 1990 it is the task of this book to show that history can be reclaimed by philosophy and resurrected in postmodernity Contributors George Allan Eva T H Brann Arthur C Danto Lynn S Joy George L Kline George R Lucas Jr Alasdair MacIntyre Robert C Neville John Rickard Stanley Rosen J B Scheenwind Donald Phillip Verene
