The Foundation Of Thanatology Series Volume I Geriatrics And Thanatology:

Death and Dying John F. Szabo, 2009-11-02 While it can be traced to the 1700s the term thanatology has gained traction in recent decades to refer to the study of death. Because of the breadth of the published material and the challenges of discovery in large bibliographic databases and catalogs finding and identifying monographic material on death, dying, grief and bereavement can be extremely challenging. Although there have been several bibliographical resources published on thanatology those titles were incomplete, limited in scope or leaned heavily toward one area of the field. In *Death and Dying: An Annotated Bibliography of the Thanatological Literature* John F. Szabo provides more than 2,200 citations of monographs on the science and study of death and dying. Among the areas this volume addresses are the psychological, philosophical and attitudinal aspects, coping and dealing with the burdens of caregiving and working in the helping professions, instructional and educational topics for practitioners, primarily health care providers, cultural differences in bereavement rituals and grief, mourning and loss. In addition, notable titles on or relating to death and dying in popular culture, death themes in literature, methods of death or specific ethical policy or public issues are also included when they contribute important information to subject areas on which the book focuses. This book will be helpful to students, researchers, academics, caregivers, health care professionals, psychologists, social workers and anyone with an interest in death, dying, bereavement or the care of the terminally ill. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), [Current Catalog](#) National Library of Medicine (U.S.), 1992 First multi-year cumulation covers six years 1965-70. *Life, Death and the Elderly* Margaret Pelling, Richard M. Smith, 2003-10-04 Debates on policy concerning medical care and social welfare of the elderly become ever more pressing and many of the assumptions on which they are based are now open to question. This study sets out to provide a historical perspective on the economic, medical, class and gender relations of the elderly which until now have received relatively little attention. In particular, the position of the elderly is linked to the fundamental issues of health, disability and medical care. With attention currently focused on the setting of the retirement age, community and family care and pensions as well as wider debates on the rights of the elderly, this volume aims to supply a historical context for such issues. *Essentials of Geriatric Neuroanesthesia* Hemanshu Prabhakar, Charu Mahajan, Indu Kapoor, 2019-06-13 The book covers topics ranging from basic sciences, developmental changes in neuroanatomy and neurophysiology and effects of neuropharmacology to special situations such as brain death, ethical issues and palliative care. It discusses various neurological surgical problems and their challenges along with common problems such as Alzheimer's and Parkinson's disease. A section on Pain covers all possible modalities for relieving pain in this patient population followed by the important issue of palliative care. The book addresses the issue of cognition decline common in this group. The fact that basic sciences are included along with clinical sciences makes it a unique read for the audience. [Geriatrics and Thanatology](#) Elizabeth R. Prichard, 1984. **Nursing Education in Thanatology** Florence E. Selder, Virginia W. Barrett, Marilyn M. Rawnsley, Austin

H. Kutscher, Carole A. Lambert, Marcia Fishman, Mary Kachoyeanos, 2015-01-28 Nursing Education in Thanatology is an excellent source book for planning thanatology courses or for integrating concepts of thanatology into a nursing curriculum. As the formal teaching of thanatology in schools for health care professionals is generally overlooked and ill defined, many students and professionals will learn to deal with dying and grieving upon their first encounter with death. This practical book will aid educators in planned inclusion of thanatology in curriculum to insure the preparedness of health care professionals in assisting patients and or their families during an emotionally difficult period. There are many suggestions presented for beneficial methods of integrating thanatology education into existing courses or offering thanatology as a single course for education professionals. A vital resource for inservice coordinators working with clinicians in oncology hospital staff and health professionals in community or outpatient health centers. Nursing Education in Thanatology is excellent reading for helping professionals working with elderly people. Older Adults' Views on Death Victor G. Cicirelli, PhD, 2006-05-26 This empirically based study of older adults ranging in age from 70-90 years examines the influence of family relations, religious beliefs, age related health changes, culture and more on personal meanings of death, fears of death and views of the dying process. Gerontologists will gain a more realistic understanding of all of the factors influencing an older individual's view of death and the dying process. These views impact the development of both effective interventions to provide appropriate emotional support and coping strategies to help persons deal with fears of approaching death. **Grief and the Loss of an Adult Child** Otto S. Margolis, 1988-02-04 This book examines and describes aspects of acute grief that are peculiar to those who have lost an adult son or daughter. The essays in this volume express the view of scholars, clinicians, social workers and individuals who have personally experienced the loss of an adult child. Each contributor describes his or her experiences within the scope of thanatology itself, a discipline whose focus is on the practice of supportive physical and emotional care for those whose lives are threatened with an equal concern exhibited for the well being of their family members. A philosophy of caregiving is proposed that reinforces alternative ways of enhancing the quality of life, introduces methods of intervention on behalf of the emotional status of all involved and fosters a more mature understanding of the dying process and the problems of separation, loss, bereavement and grief. *The Life-threatened Elderly* Margot Tallmer, 1984 Why do smokers claim that the first cigarette of the day is the best? What is the biological basis behind some heavy drinkers' belief that the hair of the dog method alleviates the effects of a hangover? Why does marijuana seem to affect one's problem solving capacity? Intoxicating Minds is in the author's words a grand excavation of drug myth. Neither extolling nor condemning drug use, it is a story of scientific and artistic achievement, war and greed, empires and religions and lessons for the future. Ciaran Regan looks at each class of drugs, describing the historical evolution of their use, explaining how they work within the brain's neurophysiology and outlining the basic pharmacology of those substances. From a consideration of the effect of stimulants such as caffeine and nicotine and the reasons and consequences of their sudden popularity in the seventeenth century, the book moves to a

discussion of more modern stimulants such as cocaine and ecstasy In addition Regan explains how we process memory the nature of thought disorders and therapies for treating depression and schizophrenia Regan then considers psychedelic drugs and their perceived mystical properties and traces the history of placebos to ancient civilizations Finally Intoxicating Minds considers the physical consequences of our co evolution with drugs how they have altered our very being and offers a glimpse of the brave new world of drug therapies
