Introduction to the Proceedings of the Fourth European Conference on Comparative Neurobiology: Evolution and Development of Nervous Systems

This conference marks the fourth in a series initiated by Hans J. ten Donkelaar and Gerhard Roth that address comparative neurobiological issues. The first conference ('Sensorimotor Integration: Organization of Premotor Networks') was held in Doorwerth, The Netherlands in 1994, the second ('The Forebrain in Nonmammalian Vertebrates: Structure, Function, and Evolution') in Cologne, Germany in 1998, and the third ('Modern Views of Brain Homologies') in Murcia, Spain in 2001. Like previous meetings of the European Conference on Comparative Neurobiology, the main aim of the fourth conference was to bring together neurobiologists interested in the evolution of the brain through the study of its development, adult structure and function in different groups of vertebrates. These conferences are the meeting point par excellence for evolutionary neuroscientists to interact with colleagues working in similar fields and/or having similar interests. The Fourth European Conference on Comparative Neurobiology, held at St. John's College in Oxford, United Kingdom, on April 15–17, 2004, was dedicated to the evolution and development of nervous systems, in vertebrates as well as in invertebrates. Its proceedings appear in this special double issue of *Brain Research Bulletin*. Main topics of the conference were forebrain evolution, amniote motor systems, brain development in vertebrates, and shared features of development across the Bilateria. Special lectures were given by Anton Reiner on the nomenclature of the avian brain, Philippe Vernier on evolution of dopaminergic receptors, Andrew Lumsden on boundaries and compartments in the developing brain, Adam Wilkins on developmental evolution, and Antonio Simeone on *Otx* genes in brain evolution.

The Fourth European Conference on Comparative Neurobiology not only attracted a large number of European neurobiologists (Belgium, Czech Republic, Denmark, France, Germany, Hungary, Italy, Poland, Portugal, Russia, Spain, Sweden, Switzerland, The Netherlands, and United Kingdom), but also from the other continents (Japan, South Africa,

and United States). Like the previous meeting in Murcia, the conference attracted an increasing number of developmental neurobiologists, using gene expression and other molecular approaches as their tools to unravel the comparative organization of the brain. Combined with more 'classical' approaches, such as tract-tracing, electron microscopy and immunohistochemistry, these techniques provide the tools for our growing understanding of the developmental evolution of brains, both vertebrate and invertebrate. The participants of the Fourth Conference on Comparative Neurobiology will meet again at the fifth conference that will be organized by Philippe Vernier, Mario Wullmann, Agustín González and Hans ten Donkelaar at the famous Museum d'Histoire Naturelle in Paris in 2007, the Institute where our 'forefathers' in the comparative study of animal life Georges Cuvier and Étienne Geoffroy de St. Hilaire worked. Finally, we would like to thank the Editor-in-Chief of *Brain Research Bulletin*, Dr. Stephen Dunnett, for his willingness and support to publish the proceedings of the conference. We also thank all the scientists and collaborators who helped in the organization of the meeting, the various sponsors that supported the meeting, St. John's College and the Department of Human Anatomy and Genetics, University of Oxford in particular.
