The Freeways:

The Freeways of Los Angeles David I. Thompson, 2010-03-27 A detailed mini guidebook about Los Angeles freeways and select boulevards *Future of the Highway Program* United States. Congress. Senate. Committee on Public Works. Subcommittee on Transportation, 1975 **California Before the Freeways** Kenneth E. Bingham, 2013-05 California Before the Freeways A Pictorial History of California s Highways 1912 1919 A 214 page picture rich book showing people and automobiles along highways byways and wood plank roads in California between 1912 1919 Pictures shows bygone tourist routes vistas antique cars dirt and desert wood plank roadways old cities and towns and the people instrumental in getting California s highways built over Hill and DALE The State Highway Commission overcoming its great native modesty called attention to the fact that it was at present financially embarrassed and that unless some extraordinary legislation was developed it would be tee totally busted before funds could be derived from the proposed bond issue which under existing laws could not be voted upon before the fall of 1920 at the general election a lapse of time which might just as well be a century so far as present pecuniary needs were concerned And then arose a Moses with his rod and smote the rock and funds poured forth Attorney General Webb was the man who finally evolved the plan of amending the constitution of California to provide a further sum of 40 000 000 for State Highway construction by the sale of bonds the one election serving the double purpose of amending the constitution of the state of California and providing 40 000 000 for more roads Immediately upon the setting of July 1 as the date for the election the California Good Roads Campaign Committee was formed with L A Nares of Fresno as chairman the vice chairmen being Francis Carr of Redding and Henry W Keller of Los Angeles while joint secretaries were named as follows D E Watkins manager California State Automobile Association San Francisco John F Shea secretary Northern California Hotel Men s Association E W Casson secretary Southern California Hotel Men s Association and Standish L Mitchell secretary Automobile Club of Southern California This book is based on the wonderful and classic out of print book California Highways by Ben Blow 1920 **1972 Highway Legislation, Hearings Before the Subcommittee on Roads ..., 92-2** United States. Congress. House. Public Works, 1972 **Journal of the Assembly, Legislature of the State of California** California. Legislature. Assembly, 1942 *Highway Safety Act of 1966, Hearings Before the ... 89-2, on H.R. 13290 and Related Bills, March 22, 23, 24; May 3, 4, and 5, 1966* United States. Congress. House. Public Works, 1966 **The Folklore of the Freeway** Eric Avila, 2014-05-01 When the interstate highway program connected America s cities it also divided them cutting through and destroying countless communities Affluent and predominantly white residents fought back in a much heralded freeway revolt saving such historic neighborhoods as Greenwich Village and New Orleans s French Quarter This book tells of the other revolt a movement of creative opposition commemoration and preservation staged on behalf of the mostly minority urban neighborhoods that lacked the political and economic power to resist the onslaught of highway construction Within the context of the larger historical forces of the 1960s

and 1970s Eric Avila maps the creative strategies devised by urban communities to document and protest the damage that highways wrought. The works of Chicanas and other women of color from the commemorative poetry of Patricia Preciado Martin and Lorna Dee Cervantes to the fiction of Helena Maria Viramontes to the underpass murals of Judy Baca expose highway construction as not only a racist but also a sexist enterprise. In colorful paintings East Los Angeles artists such as David Botello, Carlos Almaraz, and Frank Romero satirize, criticize, and aestheticize the structure of the freeway. Local artists paint murals on the concrete piers of a highway interchange in San Diego's Chicano Park. The Rondo Days Festival in St. Paul, Minnesota, and the Black Archives History and Research Foundation in the Overtown neighborhood of Miami preserve and celebrate the memories of historic African American communities lost to the freeway. Bringing such efforts to the fore in the story of the freeway revolt, *The Folklore of the Freeway* moves beyond a simplistic narrative of victimization. Losers perhaps in their fight against the freeway, the diverse communities at the center of the book nonetheless generate powerful cultural forces that shape our understanding of the urban landscape and influence the shifting priorities of contemporary urban policy.

Highway Noise; a Design Guide for Highway Engineers Bolt, Beranek, and Newman, Bolt, Beranek, and Newman, inc., 1971. Various methods of assessing noise loudness and noise annoyance are reviewed and explained. Sources, types, and intensities of traffic noise are noted. Typical means of abatement and attenuation are described. Design criteria for various land uses ranging from low density to industrial are suggested and compared with the results of previous BBN and British systems for predicting annoyance and complaint. A design guide for predicting traffic noise capable of being programmed for batch and on-line computer applications is presented in form suitable for use as a working tool. A flow diagram describes the interrelationships of elements in the traffic noise prediction methodology, and each element is discussed in detail in the text. The text is presented as a tape recording that takes the listener through a series of traffic situations with such variables as traffic distance, flow, velocity, distance outdoors and indoors, and presence or absence of absorbers and attenuators.

The Highway Capacity Manual: A Conceptual and Research History Roger . P. Roess, Elena . S. Prassas, 2014-04-03. Since 1950 the Highway Capacity Manual has been a standard used in the planning, design, analysis, and operation of virtually any highway traffic facility in the United States. It has also been widely used abroad and has spurred the development of similar manuals in other countries. The twin concepts of capacity and level of service have been developed in the manual, and methodologies have been presented that allow highway traffic facilities to be designed on a common basis and allow for the analysis of operational quality under various traffic demand scenarios. The manual also addresses related pedestrian, bicycle, and transit issues. This book details the fundamental development of the concepts of capacity and level of service and of the specific methodologies developed to describe them over a wide range of facility types. The book is comprised of two volumes. Volume 1: this book focuses on the development of basic principles and their application to uninterrupted flow facilities: freeways, multilane highways, and two-lane highways. Weaving, merging, and diverging segments on freeways and multilane highways.

are also discussed in detail Volume 2 focuses on interrupted flow facilities signalized and unsignalized intersections urban streets and arterials It is intended to help users of the manual understand how concepts approaches and specific methodologies were developed and to understand the underlying principles that each embodies It is also intended to act as a basic reference for current and future researchers who will continue to develop new and improved capacity analysis methodologies for many years to come *Hearings, Reports and Prints of the Senate Committee on Banking and Currency* United States. Congress. Senate. Committee on Banking and Currency, 1961
