The Fundamental Concepts Of Metaphysics World Finitude Solitude:

The Fundamental Concepts of Metaphysics Martin Heidegger, 1996-01-22 an important addition to the translations of Heidegger's lecture courses Heidegger's voice can be heard with few of the jolting Germanicisms with which so many translations of Heidegger's texts have been burdened International Philosophical Quarterly The translators of these lectures have succeeded splendidly in giving readers an intimation of the tensely insistent tone of the original German Heidegger's concern with a linguistic preconsciousness and with our entrancement before the enigma of existence remains intensely contemporary Choice There is much that is new and valuable in this book and McNeill and Walker's faithful translation makes it very accessible Review of Metaphysics Whoever thought that Heidegger has no surprises left in him had better read this volume If its rhetoric is hard and heavy its thought is even harder and essentially more daring than Heideggerians ever imagined Heidegger could be David Farrell Krell First published in German in 1938 as volume 29/30 of Heidegger's collected works The Fundamental Concepts of Metaphysics includes an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature Heidegger's concepts of organism animal behavior and environment are uniquely developed and defined with intensity This work the text of Martin Heidegger's lecture course of 1929/30 is crucial for an understanding of Heidegger's transition from the major work of his early years Being and Time to his later preoccupations with language truth and history First published in German in 1983 as volume 29/30 of Heidegger's collected works The Fundamental Concepts of Metaphysics includes an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature Heidegger's concepts of organism animal behavior and environment are uniquely developed and defined with intensity Kierkegaard and the Quest for Unambiguous Life George Pattison, 2013-01-10 This book looks at Kierkegaard with a fresh perspective shaped by the history of ideas framed by the terms romanticism and modernism Modernism here refers to the kind of intellectual and literary modernism associated with Georg Brandes and such later nineteenth and early twentieth century figures as J P Jacobsen Nietzsche Dostoevsky Ibsen all often associated with Kierkegaard in early secondary literature and the young Georg Lukacs This movement currently attracting increasing scholarly attention fed into such varied currents of twentieth century thought as Bolshevism as in Lukacs himself fascism and the early existentialism of e.g. Shestov and the radical culture journal The Brenner in which Kierkegaard featured regularly and whose readers included Martin Heidegger Each of these movements has arguably its own Romantic aspect and Kierkegaard thus emerges as a figure who holds together or in whom are reflected both the aspirations and contradictions of early romanticism and its later nineteenth and twentieth century inheritors Kierkegaard's specific staging of his authorship in the contemporary life of Copenhagen then undergoing a rapid transformation from being the backward capital of an absolutist monarchy to a modern cosmopolitan city provides a further focus for the volume In this situation the early Romantic experience of nature as providing a source of healing and an experience of unambiguous life is

transposed into a more complex and ultimately catastrophic register In articulating these tensions Kierkegaard's authorship provided a mirror to his age but also anticipated and influenced later generations who wrestled with their own versions of this situation

Intensities Katharine Sarah Moody, 2016-05-23 Is the affirmation or intensification of life a value in itself Can life itself be thought This book breaks new ground in religious and philosophical thinking on the concept of life It captures a moment in which such thinking is regaining its force and attraction for scholars and the relevance of thought to social cultural political and religious dilemmas about how and why to live Bringing together original contributions by highly distinguished authors in the field of Continental philosophy of religion including John D Caputo Pamela Sue Anderson Philip Goodchild Alison Martin and Don Cupitt this book has a distinctiveness based on its refusal to sit easily within either secular philosophical or theological approaches The concept of life mobilizes a thinking that crosses narrow disciplinary boundaries whilst retaining philosophical rigour Three sections explore the various dimensions of the question of life The Politics of Life Life and the Limits of Thinking and Life and Spirituality This book will be of interest to a broad range of readers in the humanities particularly to philosophers theologians cultural theorists and all those interested in philosophical or theological debates on the concept of life

A Philosophy of Prayer George Pattison, 2024-07-02 Exploring the silence of prayer in Post Kantian philosophy and traditional spirituality A Philosophy of Prayer explores prayer within the perspective of post Kantian philosophy Against a background of traditional sources including Augustine The Cloud of Unknowing and the seventeenth century French school of spirituality the book uses Schleiermacher Kierkegaard Dostoevsky Heidegger Berdyaev Tillich Marcel Simone Weil Emmanuel Levinas and Jean Louis Chr tien to provide an interpretation of what is meant by the passivity and self annihilation of the praying self suggesting an apophatics of the personality Pattison pays particular attention to the question of language and the implications of the role given to silence in traditional texts arguing that language remains a defining element of the human God relationship and that silence is not to be construed as the negation of language but as the revelation of the depth of language itself The basic structure of prayer is shown to be implicitly eschatological oriented toward a coming kingdom of justice and peace while at the same time expressing a deep desire for ontological homecoming a tension manifest in respectively Levinas and Heidegger On Pattison's reading prayer calls for and develops a particular orientation of the self toward existence corresponding to the virtue of humility long understood as the basic Christian virtue This is shown to be in tension with modernity's commitment to strong versions of autonomy However the choice of humility is not presented as the reinstatement of religious heteronomy but as a free choice of the praying self

Animal Worlds McMahon Laura McMahon, 2019-05-29 Focusing on a recent wave of international art cinema Animal Worlds offers the first sustained analysis of the relations between cinematic time and animal life Through an aesthetic of extended duration films such as Bestiaire 2010 The Turin Horse 2011 and A Cow's Life 2012 attend to animal worlds of sentience and perception while registering the governing of life through biopolitical regimes Bringing together Gilles Deleuze

s writings on cinema and on animals while drawing on Jacques Derrida Jean Christophe Bailly Nicole Shukin and others the book argues that these films question the biopolitical reduction of animal life to forms of capital opening up realms of virtuality becoming and alternative political futures *Animal Philosophy* Matthew Calarco, Peter Atterton, 2004-07-30 *Animal Philosophy* is the first text to look at the place and treatment of animals in Continental thought A collection of essential primary and secondary readings on the animal question it brings together contributions from the following key Continental thinkers Nietzsche Heidegger Bataille Levinas Foucault Deleuze Guattari Derrida Ferry Cixous and Irigaray Each reading is followed by commentary and analysis from a leading contemporary thinker The coverage of the subject is exceptionally broad ranging across perspectives that include existentialism poststructuralism postmodernism phenomenology and feminism This anthology is an invaluable one stop resource for anyone researching teaching or studying animal ethics and animal rights in the fields of philosophy cultural studies literary theory sociology environmental studies and gender and women s studies **The New Yearbook for Phenomenology and Phenomenological Philosophy** Burt Hopkins, John Drummond, 2015-03-24 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl s groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer **The Ethics of Time** John Panteleimon Manoussakis, 2016-12-15 The Ethics of Time utilizes the resources of phenomenology and hermeneutics to explore this under charted field of philosophical inquiry Its rigorous analyses of such phenomena as waiting memory and the body are carried out phenomenologically as it engages in a hermeneutical reading of such classical texts as Augustine s Confessions and Sophocles s Oedipus Rex among others The Ethics of Time takes seriously phenomenology s claim of a consciousness both constituting time and being constituted by time This claim has some important implications for the ethical self or rather for the ways in which such a self informed by time might come to understand anew the problems of imperfection and ethical goodness Even though a strictly philosophical endeavour this book engages knowledgeably and deftly with subjects across literature theology and the arts and will be of interest to scholars throughout these disciplines **Analysing Darkness and Light: Dystopias and Beyond**, 2023-08-28 The book situates itself in the fields of philosophy political theory aesthetics and theories of art linking its discussions of fictional dystopias to debates on ongoing crises It asks Are dystopias a useful tool for imagining ways out of sombre situations or do they prevent us from engaging in transformative action The book consists of a thorough introduction and three major sections 1 Dystopias of Meaninglessness 2 Techno Euphoria vs Terror of Technology and 3 Dystopias Come True The individual chapters discuss among other things liberalism and conservatism luxury communism pandemics technology induced anxiety empty speech ethics film literature architecture and music Meaning Takes Time to Unfold: Towards a Heideggerian Ontology of Temporal Differentiation Renxiang Liu, 2025-03-29 This book proposes a reconsideration of the intertwinement of time meaning and the piecemeal unfolding of

things It gives a phenomenological ontological account of the time horizon at work in each being's manifestation explores the notion of time as a productive resistance in this manifestation and redefines human finitude and subjectivity accordingly to enable an attentive mode of waiting for meaning The discussion is significantly informed by but not limited to the works of Martin Heidegger and thus responds to the question of the turn in Heidegger's career by suggesting a systematic framework centered upon a generalized finitude of Being as such which may have consistently underlain Heidegger's thinking before and after the turn As subjectivity receives a qualified affirmation in the book in contrast to both subjectivist voluntarism and impersonalism this text also opens up the possibility to think of the plurality of human beings as essential to being human While the book is a continuation of a few traditions in continental philosophy which takes time philosophically seriously it is distinctive in not considering time abstractly but always situating its conceptualization in the context of what it means for a thing or an event to be Instead of a mere measure of change an itself invariant structure of happening or a new metaphysical absolute time is interpreted here as the way beings are The interpretation comes from and seeks to do justice to the basic experience of time bringing about wonder fulfillment or disappointment The book appeals to students and researchers working on Heidegger scholarship phenomenology and more generally the philosophy of time and subjectivity It inspires a patience for meaning in mortal transience to find dignity and beauty in what will eventually expire that is in life as such
