Re-Engineering The Classics Matthew Sadler, Steve Giddins, 2023-05-03 Are you ready for the truth about forty of the most fascinating and complex chess games ever played by World Champions and other top grandmasters Grandmaster Matthew Sadler and renowned chess writer Steve Giddins take a fresh look at some classic games ranging from Anderssen Dufresne played in 1852 to Botvinnik Bronstein 1951 and Geller Euwe 1953 played a century later They unleashed the collective power of Leela Komodo and Stockfish to help us humans understand what really what really happened in these games of World Champions and fan favorites such as Bent Larsen Michael Basman and Tony Miles The first engines improved our understanding of the classic games by pointing out the tactical mistakes in the original contemporary game notes But the expertise of Matthew Sadler in his third book on the use of engines to deepen our chess understanding is to

uncover the positional course of a game The modern engines who came alive after 2018 can change our whole perception of the strategic and technical pattern of a game You will for example learn to appreciate and understand a classic Capablanca endgame A classic Petrosian exchange sacrifice A winning and then losing king hunt endgame between Spassky and Tal You will see how Bent Larsen already understood the strength as the h pawn march far before that was revealed by AlphaZero We will see new strategic ideas and plans that human players had not previously thought of Even the greatest King s Indian player ever Viktor Korchnoi would be amazed by the engine s unique ideas on how break through on the Queen side The most instructive games are often those which are more strategic and technical That is why the modern chess engine is such a helpful tool to enrich our understanding With these engines the authors have re engineered a wonderful and highly entertaining series of games generating dozens of positional chess lessons that will help every club player and expert to improve their game
