Job Gap Letter Of Explanation

September 18, 2050

Mr. James Anderson

Talent Acquisition Manager

Omega Solutions Inc.

33 Parkway Drive

New York, NY 10022

(212) 555-7890

Dear **Mr. Anderson**,

I am writing to provide an explanation for the job gap in my employment history, as indicated in my resume.

During the period from March 2050 to August 2050, I experienced a gap in my employment due to a family medical situation that required my full attention.

Throughout this time, I remained actively engaged in various productive activities aimed at personal and professional development. These activities included online courses in data analysis, volunteering at local community centers, and attending industry-related webinars, all of which allowed me to enhance my skill set, expand my knowledge, and contribute positively to my community.

Although the gap in my employment may initially seem unrelated to my career aspirations, the experiences gained during this time have directly contributed to my professional growth. For instance, the data analysis course I completed has further strengthened my ability to process complex datasets, a key component of the role I am seeking.

Furthermore, the job gap provided me with the opportunity to reflect on my career goals and priorities, leading to a renewed sense of determination and commitment to my chosen field. I have actively pursued opportunities to reenter the workforce, including networking, applying for relevant roles, and attending virtual job fairs.

I am eager to leverage my skills and experiences in data analysis and management and am fully committed to making a meaningful contribution to Omega Solutions Inc. Should you require further information or wish to discuss this matter in more detail, please feel free to contact me at

SSB Interviews and Psycho Intelligence Tests , **The 71F Advantage** National Defense University Press, 2010-09 Includes a foreword by Major General David A Rubenstein From the editor 71F or 71 Foxtrot is the AOC area of concentration code assigned by the U S Army to the specialty of Research Psychology Qualifying as an Army research psychologist requires first of all a Ph D

from a research not clinical intensive graduate psychology program Due to their advanced education research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain In terms of numbers the 71F AOC is a small one with only 25 to 30 officers serving in any given year However the 71F impact is much bigger than this small cadre suggests Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding preserving and enhancing the health well being morale and performance of Soldiers and military families As is clear throughout the pages of this book they do this in many ways and in many areas but always with a scientific approach This is the 71F advantage applying the science of psychology to understand the human dimension and developing programs policies and products to benefit the person in military operations This book grew out of the April 2008 biennial conference of U S Army Research Psychologists held in Bethesda Maryland This meeting was to be my last as Consultant to the Surgeon General for Research Psychology and I thought it would be a good idea to publish proceedings which had not been done before As Consultant I d often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living In addition to our core group of 71Fs at the Bethesda 2008 meeting we had several brand new members and a number of distinguished retirees the grey beards of the 71F clan Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels with no sign of easing and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health well being and performance of Soldiers and their families
