Families National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Forum on Promoting Children's Cognitive, Affective, and Behavioral Health,2017-10-30 Increasing numbers of evidence based interventions have proven effective in preventing and treating behavioral disorders in children However the adoption of these interventions in the health care system and other systems that affect the lives of children has been slow Moreover with few exceptions current training in many fields that involve the behavioral health of children falls short of meeting the needs that exist In general this training fails to recognize that behavioral health disorders are among the largest challenges in child health and that changing cognitive affective and behavioral health outcomes for children will require new and more integrated forms of care at a population level in the United States To examine the need for workforce development across the range of health care professions working with children and families as well as to identify innovative training models and levers to enhance training the Forum on Promoting Children s Cognitive Affective and Behavioral Health held a workshop in November 2016 Workshop panelists and participants discussed the needs for workforce development across the range of health care professions working with children youth and families and identified innovative training models and levers for change to enhance training This publication summarizes the presentations and discussions from the workshop **Guidance for**

Shakespeare's Once and Future Child Joseph Campana,2024-05-06 A study of Shakespeare s child figures in relation to their own political moment as well as our own Politicians are fond of saying that children are the future How did the child become a figure for our political hopes Joseph Campana s book locates the source of this idea in transformations of childhood and political sovereignty during the age of Shakespeare changes spectacularly dramatized by the playwright himself Shakespeare s works feature far more child figures and more politically entangled children than other literary or theatrical works of the era Campana delves into this rich corpus to show how children and childhood expose assumptions about the shape of an ideal polity the nature of citizenship the growing importance of population and demographics and the question of what is or is not human As our ability to imagine viable futures on our planet feels ever more limited and as children take up legal proceedings to sue on behalf of the future it behooves us to understand the way past child figures haunt our conversations about intergenerational justice Shakespeare offers critical precedents for questions we still struggle to answer

Children's Lives, Children's Futures Paul Croll,Gaynor Attwood,Carol Fuller,2010-02-15 Children s Lives Children s Futures focuses on how children in their first year of high school feel about school its place in their lives and its role in their futures The study is grounded in educational studies drawing on pupil voice and children s active role in education and on the sociology of childhood where children are viewed as active constructors of their lives In many Western societies there is concern that children from less advantaged social backgrounds have limited aspirations and are disproportionately unlikely to go to university Croll Attwood and Fuller consider the nature of children s engagement with education the choices and constraints they experience and the reasons some young people fail to take advantage of educational opportunities
