**Microhistories of Composition** Bruce McComiskey, 2016-04-01 Writing studies has been dominated throughout its history by grand narratives of the discipline but in this volume Bruce McComiskey begins to explore microhistory as a way to understand enrich and complicate how the field relates to its past Microhistory investigates the dialectical interaction of social history and cultural history enabling historians to examine uncommon sites objects and agents of historical significance overlooked by social history and restricted to local effects by cultural history This approach to historical scholarship is ideally suited for exploring the complexities of a discipline like composition Through an introduction and eleven chapters McComiskey and his contributors including major figures in the historical research of writing studies such as Louise Wetherbee Phelps Kelly Ritter and Neal Lerner develop focused narratives of particular significant moments or themes in disciplinary history They introduce microhistorical methodologies and illustrate their application and value for composition historians contributing to the complexity and adding momentum to the emerging trend within writing studies toward a richer reading of the field's past and future Scholars and historians of both composition and rhetoric will appreciate the fresh perspectives on institutional and disciplinary histories and larger issues of rhetorical agency and engagement enacted in writing classrooms that are found in Microhistories of Composition Other contributors include Cheryl E Ball Suzanne Bordelon Jacob Craig Matt Davis Douglas Eyman Brian Gogan David Gold Christine Martorana Bruce McComiskey Josh Mehler Annie S Mendenhall Kendra Mitchell Antony N Ricks David Stock Kathleen Blake Yancey Bret Zawilski and James T Zebroski

Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for

the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field     The Lure of Literacy Michael Harker, 2014-12-03 readers of LiCS will find a strong argument for how understandings of literacy are fundamental to the work that compositionists do making this book useful not only to those doing similar work but also to be shared with colleagues who have less familiarity with literacy studies The Lure of Literacy presents a model of how theories of literacy can be applied to the debates that beset compositionists again and again offering a way out of their unproductive cycles Literacy in Composition The Lure of Literacy promises to transcend the stale and unproductive debate on freshman composition that has gripped English studies for more than a century It is the first book to chart the origin of the discussion from the early twentieth century to the advent of the New Literacy Studies Michael Harker recontextualizes proposals to abolish compulsory composition and reimagines pedagogical conditions in English studies in order to present a different model for first year writing This new model for compulsory composition programs focuses on students attitudes about composition and interrogates the very idea of literacy itself
