Slovenia A Small Country In The Global Economy:

Slovenia Marjan Senjur, Centre for International Cooperation and Development (Slovenia), 1993 **Small Countries in a Global Economy** D. Salvatore, M. Svetlicic, J. Damijan, 2001-03-13 This book addresses the issues surrounding the prospects of small countries in an integrated globalized world The contributors support the thesis that the new global environment does not represent a twilight for small countries but recognise that the honeymoon has not been as comfortable as others had expected They demonstrate that by entering the global arena or by consolidating into regional alliances small countries do not lose and may even gain sovereignty in areas previously closed to them Internationalization in Central and Eastern Europe Marin Alexandrov Marinov, 2018-04-27 This title was first published in 2002 This is a unique volume among the existing variety of publications on foreign direct investment FDI in Central and Eastern Europe CEE because it focuses on the internationalization process taking place there It addresses the rapid changes of the business climate in the region that have led to intensive internationalization of companies businesses and national economies Existing FDI books have mostly taken the perspective of attracting inward FDI flows missing the aspect of FDI outflows from CEE countries While foreign investors face the specific context of a region that poses new requirements to their internationalization strategies approaches and practices domestic companies must strive to make their businesses international Consequently the book presents the features of internationalization in CEE from home and host company and country perspectives providing a fresh perspective on this major economic problem **Handbook on Small Nations in the Global Economy** D. van den Bulcke, Alain Verbeke, Wenlong Yuan, 2009 These studies of the international competitiveness of small open economies demonstrate the critical importance of foreign direct investment as an engine of economic development multinational enterprises are the key drivers of international competitiveness Alan M Rugman University of Reading UK Globalization has made every country small The global economic crisis has made sure that every country has increasingly realised that it is open and vulnerable as well This volume is both timely and relevant Small country studies should become mainstream for scholars in business economics and politics Rob van Tulder RSM Erasmus University the Netherlands This book provides a fresh and clear eyed view of the relationship between multinationals and location advantages of countries It is one of the first attempts to build a constructive bridge between the theory of international business and the outstanding contribution of Michael Porter about the drivers of competitiveness The authors address crucial issues demanding the attention of teachers researchers practitioners and political leaders Philippe Gugler University of Fribourg Switzerland This unique extensive Handbook illustrates that multinational enterprises can contribute substantially to the competitive advantage of small countries It advances the notion that small nations increasingly need to rely on both home grown and foreign multinational enterprises to achieve domestic economic success in industries characterized by international competition The expert contributors explore the roles of firms in a range of small successful open economies driven by such multinational enterprises

across the globe They juxtapose country data sets against Professor Michael Porter s paradigm of single diamond components and show that these single diamond components reflect merely a set of initial conditions which can be improved upon through both inward and outward direct investment Concluding that multinational enterprises create resource linkages between the home and host environments in which they operate this Handbook proves to be a fascinating read for academics students and researchers with an interest in business and management economics and international economics **Who's**

Foreign Direct Investment in the Successor States of Yugoslavia Joel I. Deichmann, 2020-11-16. This edited volume offers a descriptive analysis of foreign direct investment (FDI) flows and cumulative stock, industrial composition, and important spatial trends for each successor state of former Yugoslavia: Bosnia Herzegovina, Croatia, Kosovo, Montenegro, North Macedonia, Serbia, and Slovenia. The chapters are written by academic experts on the topic from each of these countries and are organized systematically in order to facilitate comparison between the states. The aim of this book is to advance scholarly knowledge about FDI in Southeastern Europe 25 years after the dissolution of Yugoslavia. Each chapter includes a summary of scholarly contributions published on the topic in English language and local language journals, a discussion of origins, composition by industry, and location choice within the country from 1995 to 2018, using Dunning's 1980 eclectic paradigm as a discussion framework. The chapters conclude with prospects for FDI over the next twenty-five years, with emphasis on economic growth, projections, EU integration, and other relevant country-specific considerations the local authors deem relevant. Special attention is given to specific companies operating in Yugoslavia prior to its breakup and how these firms have been impacted by dissolution, recession, efforts toward European Union membership. The authors also examine the past and potential impact of FDI from unforeseen events such as the Global Financial Crisis and COVID-19. This book appeals to scholars of geography, international business, economics, and economic history of the former Yugoslavia, as well as professionals working in the region and on related topics elsewhere.
