## **Small Powers At Sea Scandinavia And The New International Marine Order:**

Small Powers at Sea Finn Laursen, 2021-09-27 Small Powers at Sea presents an analysis of the marine policies of Denmark Norway and Sweden from the First UN Conference on the Law of the Sea in 1958 until the conclusion of the Third UN Conference on the Law of the Sea in 1982 The main substantive chapters cover security aspects continental shelf policies fisheries shipping and marine environment as well as deep seabed mining The study is comparative and conducted from a political science perspective discussing how to explain the rather divergent Scandinavian marine policies A state centric rational actor model can explain much of the variance but other factors including cognitive ones and the role of domestic politics must be included to obtain a fuller understanding of Scandinavian policies over time and across issue areas The

Development of the EU as a Sea-Policy Actor Finn Laursen, 2020-10-30 The Development of the EU as a Sea Policy Actor explores the marine and maritime policies of the European Union EU including fisheries maritime transport marine environment and maritime safety policies These policies have made the EU an important sea policy actor internally and externally **China's Marine Legal System and the Law of the Sea** Keyuan Zou, 2005-06-01 Being one of the largest coastal States in the world China's marine legal system is significant in the overall development of the international law of the sea This book focuses on the establishment and development of China's marine legal system in the context of the new law of the sea centered on the 1982 United Nations Convention on the Law of the Sea which China ratified in 1996 It consists of five parts concerning respectively a general survey of China's marine legal system navigation and maritime security marine resources management marine environmental protection and marine scientific research China's basic marine laws and regulations are discussed and assessed in detail throughout the book The book is of interest to lawyers whether practicing or academic officials in national governments and international organizations and students and scholars in academia who are interested in international law international relations and ocean affairs Marine Scientific Research Florian

Wegelein, 2005-06-01 The present analysis examines the legal framework for marine scientific research with a focus on research platforms Oceanographers find themselves faced with a complex set of provisions governing their activities not only in waters of foreign jurisdiction As the riches of the oceans have become known to decision makers in coastal States international action has set the course for an ever tighter regulation of the sea uses Part XIII is analysed with respect to the remaining freedoms of research In addition the book provides an overview of air and space law relevant to research activities and their relationship with the 1982 LOS Convention Other international instruments are analysed for their significance in the context of customary law Examination of possible safeguards for research activities contained in Part XIII and XV dispute settlement complements the legal analysis of the 1982 LOS Convention Mutual trust and co operation within regional organizations are in conclusion the most promising avenues for a more favourable research climate The book addresses a legal and scientific audience which at a practical or academic level deals with the law of the sea at large and the regime of

marine scientific research in particular      **International Law and the Genetic Resources of the Deep Sea** David Kenneth Leary, 2007 Deep sea genetic resources and the interest of the biotechnology industry in their exploitation are emerging as a significant challenge for international oceans governance This book is the first comprehensive examination of this issue and explores its relationship with marine scientific research and other activities in the deep sea As well as a detailed survey of the state of industry interest in this new field of biotechnology it also sets out proposals for future sustainable management of these resources utilizing many existing international law and policy regimes      *The Law of the Sea* Laura Pineschi, Tullio Treves, 2021-09-27 The United Nations Convention on the Law of the Sea of 10 December 1982 entered into force on 16 November 1994 Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea New concepts such as the exclusive economic zone archipelagic waters transit passage through straits and the International Seabed Area are now fully recognized The fifteen member States of the European Union are a significant sample for analyzing the practice of States or at least that of the Western industrialized States as regards the law of the sea They include major and small maritime powers coastal and land locked States States with coasts on the Atlantic Ocean and States with coasts on semi enclosed seas such as the Baltic and the Mediterranean States with and without involvement in deep seabed mining and States with different interests as regards fisheries The fact that they all belong to the European Union is a very important common feature which amply justifies the choice made to study them together The book's aim is to give through essays prepared by well known specialists a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such The common positions of the member States and the results of their coordinated action also emerge from these essays The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument or at least as an instrument widely ratified by States of all continents and economic and political interests

**Navigational Rights and Freedoms and the New Law of the Sea** Donald R. Rothwell, Sam Bateman, 2021-10-18 Navigational rights and freedoms have been central to the development of the law of the sea since the original debates over whether the seas were open or closed to maritime traffic The 1982 UN Convention on the Law of the Sea recognises the legitimate rights of coastal states to proclaim sovereignty and assert jurisdiction over vast areas of maritime space In return maritime states are given a range of navigational rights over waters ranging from the territorial sea through to the high sea The new regime of the law of the sea created by the Convention presents an opportunity to review developments in the law of navigational rights and freedoms This book assesses the navigational regime established by the 1982 Convention with emphasis given to the continuing importance of the freedom of the seas Navigation in the territorial sea and international straits is reviewed especially in the Straits of Malacca and Singapore and the Torres Strait Archipelagic navigation from the

perspective of two claimant states Indonesia and the Philippines and a user state South Korea is also considered The interaction of environmental concerns with navigational rights is an important feature of the current law of the sea regime with relevant conventions assessed and the role of the International Maritime Organization in developing navigational standards considered Both European and Canadian practice in the protection of sensitive marine environments and the impact upon navigational rights is also considered Finally the roles of the International Tribunal for the Law of the Sea and the International Maritime Organization in dispute resolution are reviewed before a concluding consideration of the future for navigational rights and freedoms in the twenty first century

**Unresolved Issues and New Challenges to the Law of the Sea** Anastasia Strati, Maria Gavouneli, Nikos Skourtos, 2006-06-01 This work analyzes the management of shared fish stocks protection of the underwater cultural heritage the possibilities of establishing marine protected areas and other means for safeguarding vulnerable marine ecosystems the use of the high seas for intelligence as well as recent developments on interdiction of vessels on the high seas Special emphasis is paid to the role of international courts and tribunals in the progressive development of the law of the sea as well as the ability of the UN Convention on the Law of the Sea to accommodate new uses and challenges such as new concerns new technological possibilities in particular new contexts and functions of established rules The 1982 Convention seems capable of coping with most of them although it remains useful to explore its possibilities and limits This work covering many aspects will be useful to anyone interested in the law of the sea

**Bringing New Law to Ocean Waters** David D. Caron, Harry N. Scheiber, 2004-09-01 In this volume leading scholars and jurists in ocean law provide perspectives on the past record of legal change together with analyses of a wide range of institutional and legal innovation that are needed to meet current challenges The topics that are addressed here include policy process and legal innovation in marine fisheries management institutional capacity and jurisdictional conflict in ocean law adjudication regionalism and multilateralism in their various aspects the challenges posed by the sudden recent availability of technological access to underwater cultural heritage compensation for war related environmental damage and the problems associated with access to marine genetic materials Bringing new law to ocean waters the quest to adjust the legal order of the oceans to changing realities a quest that has produced both great achievements and grievous failures has constituted one of the major developments in international law in the last half century

The Law of the Sea and Polar Maritime Delimitation and Jurisdiction Alex G. Oude Elferink, Donald R. Rothwell, 2021-10-18 The climate and other characteristics of the polar regions have been major factors in shaping the legal regime applicable to the polar oceans In Antarctica states have had to grapple with the question of how to account for developments in the law of the sea while preserving the compromise over sovereignty contained in the Antarctic Treaty The Arctic also has presented challenges for the law of the sea as illustrated by the continued attention given to special rules for polar shipping The 1982 United Nations Convention on the Law of the Sea has led to substantial agreement on the legal

regime of ocean spaces The present volume explores the impact the Convention has had on the polar regions in this respect including after its entry into force in 1994 To this end it looks at a number of issue areas in the field of maritime delimitation baselines maritime zones delimitation of maritime zones between neighboring states and jurisdiction environmental protection navigation and fisheries from a bipolar perspective It is strongly suggested that the legal regime of the polar oceans will be further elaborated to more effectively deal with existing activities or to accommodate new activities It is likely that the United Nations Convention on the Law of the Sea will continue to provide the basic legal framework for this exercise and that states will be careful not to unravel the delicate balance contained in it
