Small Town Neighborhood Walk:

Creating Vibrant Public Spaces Ned Crankshaw, 2012-09-26 Public space and street design in commercial districts can dictate the success or failure of walkable community centers. Instead of focusing our efforts on designing new compact town centers many of which are located in the suburbs we should instead be revitalizing existing authentic town centers. This informative practical book describes methods for restoring the health and vibrancy of the streets and public spaces of our existing commercial districts in ways that will make them positive alternatives to suburban sprawl while respecting their historic character. Clearly written and with numerous photos to enhance the text *Creating Vibrant Public Spaces* uses examples from communities across the United States to illustrate the potential for restoring the balance provided by older urban centers between automobile access and walkability. In advice that can be applied to a variety of settings and scales Crankshaw describes the tenets of contemporary design theory how to understand the physical evolution of towns how to analyze existing conditions and how to evaluate the feasibility of design recommendations. Good design in commercial centers Crankshaw contends facilitates movement and access creates dynamic social spaces and contributes to the sense of a center a place where social commercial and institutional interaction is more vibrant than in surrounding districts. For all the talk of creating new green urban spaces the ingredients of environmentally aware design he points out can often be found in the deteriorating cores and neighborhoods of towns and cities across the United States. With creativity planning and commitment these centers can thrive again adding to the quality of local life and contributing to the local economy too. In *Small Town America* we meet factory workers shop owners retirees teachers clergy and mayors residents who show neighborliness in small ways but who also worry about everything from school closings and their children's futures to the ups and downs of the local economy.
