Principles of Planning Small Houses United States. Federal Housing Administration,1940 *Principles of Planning Small Houses* ,1946 *Housing Monograph Series, No. 1-4 ...* United States. National Resources Committee. Industrial

Committee,1939 **Housing Monograph Series** United States. National Resources Committee. Industrial Committee,1939

Housing, the Continuing Problem United States. National Resources Planning Board,1940 The Fractal Dimension of Architecture Michael J. Ostwald,Josephine Vaughan,2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design **The Construction of the Small House** H. Vandervoort Walsh,2022-07-21 Published during the Great

Depression era the following book is intended to assist the readers in building their own small houses A small house here is determined not through its size but rather its cost it is expected that a house can be built with a maximum budget of 42 cents per cubic foot **Spatial Planning and Sustainable Development** Mitsuhiko Kawakami,Zhen-jiang Shen,Jen-te

Pai,Xiao-lu Gao,Ming Zhang,2013-02-28 This book attempts to provide insights into the achievement of a sustainable urban form through spatial planning and implementation here we focus on planning experiences at the levels of local cities and some metropolitan areas in Asian countries This book investigates the impact of planning policy on spatial planning implementation from multidisciplinary viewpoints encompassing land use patterns housing development transportation green design and agricultural and ecological systems in the urbanization process We seek to learn from researchers in an integrated multidisciplinary platform that reflects a variety of perspectives such as economic development social equality and ecological protection with a view to achieving a sustainable urban form **Greening Affordable Housing** Abdullateef

Olanrewaju,Zalina Shari,Zhonghua Gou,2019-01-30 Books on green building theories principles and strategies applicable to life cycles of all kinds of buildings and building types are already widely available However those specifically on greening affordable housing that guide various housing stakeholders at different life cycles are still very limited This book intends to fill this gap Integrating green building enables stakeholders to address the environmental component that has not

traditionally been seen as an integral part of affordable housing development The book presents theories and principles with practical methods strategies and processes not only to make affordable housing green but also to support economic stability and social equity

Designing a Place Called Home James Wentling, 2016-12-28 This insightful volume shares design ideas to help builders planners and architects create mass produced affordable housing that pushes suburban development in more sustainable liveable directions The author argues that improving the quality of design in our new homes and communities for greater resiliency sustainability and equality we can build neighborhoods and communities where residents feel more connected to their homes and to one another Through text photographs and illustrations the book reviews prototypical American housing design then suggest ways to both learn from the past as well as adapt for new environmental imperatives demographic changes and lifestyle needs Written by a practicing architect with 25 years of experience optimizing residential design this pioneering approach to suburban building will inspire readers to view mass produced housing through a new modern lens
