Wild Mammals of Wyoming and Yellowstone National Park Steven W. Buskirk, 2016-01-12 Wild Mammals of Wyoming and Yellowstone National Park provides the scholar conservationist and interested lay reader with information on the state's 117 wild mammalian species from grizzly bears to pygmy shrews. It describes the history of mammalogy in Wyoming, the zoogeography of Wyoming mammals, and the prehistoric mammals of Wyoming. It also characterizes the habitats of Wyoming mammals and addresses the conservation and management of mammals in the region. Expanding beyond the traditional field guide, Steven W. Buskirk emphasizes taxonomic classification, geographic range, and conservation status for mammalian species. Introductory sections are provided for each order and family, and individual species accounts organize a wealth of data ranging from habitat associations to field measurements in an easy-to-use format. Featuring color species photos, continental and state scale distribution maps, and a comprehensive bibliography with nearly 1,000 references, Wild Mammals of Wyoming and Yellowstone National Park is an indispensable resource for wildlife and conservation biologists and mammalogists working in this region.

Yellowstone Wildlife Paul A. Johnsgard, 2013-06-15 Yellowstone Wildlife is a natural history of the wildlife species that call Yellowstone National Park and the Greater Yellowstone Ecosystem their home. Illustrated with stunning images by renowned wildlife photographer Thomas Mangelsen, Yellowstone Wildlife describes the lives of species in the park, exploring their habitats from the Grand Tetons to Jackson Hole. From charismatic megafauna like elk, bison, wolves, bighorn sheep, and grizzly bears to smaller mammals like bats, pikas, beavers, and otters, to some of the 279 species of birds, Johnsgard describes the behavior of animals throughout the seasons, with sections on what summer and autumn mean to the wildlife of the park, especially with the intrusion of millions of tourists each year. Enhanced by Mangelsen's wildlife photography, Yellowstone Wildlife reveals the beauty and complexity of these species' intertwined lives and that of Yellowstone's greater ecosystem.

Yellowstone and the Biology of Time Mary Meagher, Douglas B. Houston, 1999-02-01 Established in 1872, Yellowstone National Park is the oldest and one of the largest national parks in the world. In this remarkable book, scientists Mary Meagher and Douglas B. Houston present 100 sets of photographs that compare the Yellowstone of old with the park of today. Most of the photo sets include three pictures, not the usual two, with many of the original views dating back to the 1870s and 1880s. From the same photo points used by early photographers, Meagher and Houston rephotographed the scenes in the 1970s and then following the great fires of 1988 again in the 1990s. The result is an illuminating record of Yellowstone's dynamic ecosystem and its changes over time. Through close analysis of the photos and reference to the vast amount of available data, Meagher and Houston describe changes in vegetation, growth of wildlife populations, the effect of beaver occupancy on wetland areas, and geothermal and elevational shifts. At the same time, they point out the extent to which many sites have not changed despite important

switches in park policy and an increase in human activity Yellowstone National Park has long been the focus of major ecological debates Should managers allow wildfires to burn Should the elk and bison populations be controlled Are too many people visiting the park Yellowstone And The Biology Of Time offers a wealth of information to help us answer these questions A visual treasure this book will be of value to scientists from various disciplines as well as to the many people who care about Yellowstone and other protected wilderness areas around the world **Wyoming Wildlife: A Natural History** Paul Johnsgard, 2019-06-30 This book surveys Wyoming's mammal bird reptile and amphibian faunas In addition to introducing the state's geography geology climate and major ecosystems it provides 65 biological profiles of 72 mammal species 195 profiles of 196 birds 9 profiles of 12 reptiles and 6 profiles of 9 amphibians There are also species lists of Wyoming's 117 mammals 445 birds 22 reptiles and 12 amphibians Also included are descriptions of nearly 50 national and state properties including parks forests preserves and other public access natural areas in Wyoming The book includes a text of more than 150 000 words nearly 700 references a glossary of 115 biological terms nearly 50 maps and line drawings by the author and 33 color photographs by Thomas D Mangelsen Gallatin National Forest (N.F.), Ash and Iron Mountain Grazing Permit Reissuance ,1999 **Bibliography of Agriculture** ,1990 **The Greater Yellowstone Ecosystem** Robert B.
