Stewart, 2025-11-04. Riders are athletes in the truest sense of the word, yet the majority of them fail to treat themselves as such. Most riders would never consider working a horse without first warming it up, but fail to treat their own bodies with the same respect. Daniel Stewart's Ride Right system will improve rider and horse performance simply by showing riders how to improve themselves. There are three main phases in the Ride Right system: Rider biomechanics (the how and why of balance, posture, symmetry, and body awareness), strength, stamina, and suppleness. The conditioning of the rider's body with specially designed stretching and fitness exercises, rider frame of mind, Sports psychology, relaxation, and visualization. All these elements together with good health and nutrition will show riders how to excel. Healing Logics Erika Brady, 2001-04-01. Scholars in folklore and anthropology are more directly involved in various aspects of medicine such as medical education, clinical pastoral care, and negotiation of transcultural issues than ever before. Old models of investigation that artificially isolated folk medicine, complementary and alternative medicine, and biomedicine as mutually exclusive have proven too limited in exploring the real-life complexities of health belief systems as they observably exist and are applied by contemporary Americans. Recent research strongly suggests that individuals construct their health belief systems from diverse sources of authority, including community and ethnic tradition, education, spiritual beliefs, personal experience, the influence of popular media, and perception of the goals and means of formal medicine. Healing Logics explores the diversity of these belief systems and how they interact in competing, conflicting, and sometimes remarkably congruent ways. This book contains essays by leading scholars in the field and a comprehensive bibliography of folklore and medicine. **Life Begins**
