The Somato-Psychic Realm David G. Power, Dolan Power, 2025-05-01 Influenced by the groundbreaking work of Wilfred Bion *The Somato Psychic Realm* Analytic Receptivity and Resonance sees 10 internationally acclaimed psychoanalysts explore the complex interrelationship between our psychic and somatic selves and highlight its promising riches and devastating disruptions Explored theoretically and illustrated with vivid clinical examples the contributors in this volume map our current understanding on the fascinating subject of psychic and somatic selves reframing it as the somato psychic realm This collection of essays brings together the current thinking reflections and

clinical understanding of prominent Bionian psychoanalytic practitioners and scholars from Rudi Vermote to Judy Eekhoff each of whom have developed particular interests and expertise in analytically approaching the realm of the somato psychic. The reader is offered extensions of theory and vivid clinical examples and invited to consider many questions central to contemporary psychoanalytic practice: Does the body think and if so how does the analyst converse with it? Is thinking in a psychoanalytic sense best conceived of as a combined function of the soma and psyche? How does this perspective reorient analytic technique? Can we conceptualise a body to body dimension of the analytic experience and in the analytic encounter how does this dimension serve a vitalising function for the patient while remaining outside of the usual verbal and symbolising exchanges between analyst and patient? What is the fate of failures and disruptions in the somato psychic interrelationship and how does the analyst hear, recognise and respond to these failures? How does the analyst make subjective space to experience in herself the presence of these disruptions? What transformations in our technical stance does this type of clinical presentation require? As they approach the challenges of the somato psychic realm, readers will find themselves drawn into this conversation, invited by a thought provoking foreword by Patrick Miller. It will be a vital resource for psychoanalysts in training and practice alike, looking for a greater recognition of and ability to respond to problems ranging from frank somatic disorders to failures in symbolisation and thought process and the non neurotic states of mind that accompany these disorders.

The Smart Culture Robert L. Hayman, 1998. What exactly is intelligence? Is it social achievement? Professional success? Is it common sense? Or the number on an IQ test? Interweaving engaging narratives with dramatic case studies, Robert L. Hayman Jr has written a history of intelligence that will forever change the way we think about who is smart and who is not. To give weight to his assertion that intelligence is not simply an inherent characteristic but rather one which reflects the interests and predispositions of those doing the measuring, Hayman traces numerous campaigns to classify human intelligence. His tour takes us through the early craniometric movement, eugenics, the development of the IQ, Spearman's general intelligence and more recent works claiming a genetic basis for intelligence differences. What Hayman uncovers is the maddening irony of intelligence: that scientific efforts to reduce intelligence to a single ordinal quantity have persisted and at times captured our cultural imagination not because of their scientific legitimacy but because of their longstanding political appeal. The belief in a natural intellectual order was pervasive in scientific and political thought both at the founding of the Republic and throughout its nineteenth century Reconstruction. And while we are today formally committed to the notion of equality under the law, our culture retains its central belief in the natural inequality of its members. Consequently, Hayman argues, the promise of a genuine equality can be realized only when the mythology of intelligence is debunked, only that is when we recognize the decisive role of culture in defining intelligence and creating intelligence differences. Only culture can give meaning to the statement that one person or one group is smarter than another. And only culture can provide our motivation for saying it. With a keen wit and a sharp eye, Hayman highlights

the inescapable contradictions that arise in a society committed both to liberty and to equality and traces how the resulting tensions manifest themselves in the ways we conceive of identity community and merit **"I Am The Smartest Man I Know": A Nobel Laureate's Difficult Journey** Ivar Giaever, 2016-11-04 There is a plethora of anecdotes that provide fascinating insight into a person who has made the most of his life CERN Courier A unique individual with a fascinating life story Ivar Giaever is a scientist who won the Nobel Prize in Experimental Physics in 1973 In his own words Giaever relates an absorbing tale of how important luck and good fortune have been in shaping his life He narrates the story of an ordinary childhood in Norway and an unremarkable undergraduate career at university After finishing his engineering degree he served in the Norwegian army and married his childhood sweetheart Inger Skramstad His desire to make a better life for his new family led Ivar to Canada and then to the United States Even without an advanced degree in a scientific field Ivar was given the opportunity to work with cutting edge scientific researchers at General Electric R D in Schenectady New York While there he completed his PhD at Rensselaer Polytechnic Institute one of the United States oldest technological universities His work on superconductivity led to worldwide recognition and the Nobel Prize This memoir is more than the story of an accomplished world renowned scientist it is an engaging reminiscence of an independent highly creative thinker and problem solver who loves games and puzzles skiing and windsurfing and time with friends and family Dr Ivar Giaever's fascinating story intertwines his views on the nature of science scientific processes contemporary issues such as global warming and the great benefits the Nobel Prize has afforded him Written with humor and often tongue in cheek *I am the Smartest Man I know* is one man's meditation on science intellectual inquiry and life itself *Intelligent Biomedical Technologies and Applications for Healthcare 5.0* Lalit Garg, Gayatri Mirajkar, Sanjay Misra, Vijay Kumar Chattu, 2024-10-17 *Intelligent Biomedical Technologies and Applications for Healthcare 5.0* Volume Sixteen covers artificial health intelligence biomedical image analysis 5G the Internet of Medical Things intelligent healthcare systems and extended health intelligence EHI This volume contains four sections The focus of the first section is health data analytics and applications The second section covers research on information exchange and knowledge sharing The third section is on the Internet of Things IoT and the Internet of Everything IoE based solutions The final section focuses on the implementation assessment adoption and management of healthcare informatics solutions This new volume in the *Advances in Ubiquitous Sensing Applications for Healthcare* series focuses on innovative methods in the healthcare industry and will be useful for biomedical engineers researchers and students working in interdisciplinary fields of research This volume bridges these newly developing technologies and the medical community in the rapidly developing healthcare world introducing them to modern healthcare advances such as EHI and Smart Healthcare Systems Provides a comprehensive technological review of cutting edge information in the wide domain of Healthcare 5.0 Introduces concepts that combine computational methods network standards and healthcare systems to provide a much improved more affordable experience delivered by healthcare services
