Smelly Science Body Odours:

Smelly Science Fair Projects Leah M. Rybolt, Dr. Thomas R. Rybolt, 2015-07-15 Your sense of smell plays a huge role in how you taste what you remember what attracts you and what repels you Through photos diagrams and hands on experiments you ll discover how to find out your odor threshold conduct a jelly bean smell and taste test and learn what makes those feet so stinky **Stinky Science** Edward Kay, 2019-04-02 Who knew science could be so smelly This innovative book is a complete exploration of the olfactory system with a side of gross out hilarity First it tackles the basics from why things stink to how our sense of smell works hint it has to do with the six million scent receptors way up inside our noses Then it moves on to some specifics such as the link between smells and memories some of the stinkiest stinks on Earth the chemicals smells are made of and more The eww on every page is sure to hold every young scientist s attention

Headwords. Stinky Secrets of Your Noses, Ears, Mouth and Mind Pasquale De Marco, Headwords Stinky Secrets of Your Noses Ears Mouth and Mind is a hilarious and informative exploration of the grossest things about the human body From the noises your stomach makes to the way your nose runs when you have a cold there s a whole world of grossness going on inside you that you may not even be aware of This book takes you on a journey through the human body exploring all the weird wacky and downright disgusting things that happen inside it You ll learn about the science behind boogers the truth about earwax and the grossest things people put in their mouths You ll also explore the mysteries of the brain the senses and the future of medicine Along the way you ll meet some fascinating characters like the man who ate his own leg and the woman who gave birth to a baby with two heads You ll also learn about some of the most disgusting diseases and conditions that can affect the human body like elephantiasis and necrotizing fasciitis Headwords is perfect for anyone who loves science humor or just plain old gross stuff It s also a great way to learn about the human body in a fun and engaging way So what are you waiting for Dive in and explore the grossest things about the human body today Here s a sneak peek at some of the things you ll learn in this book The truth about boogers Are they really just dried mucus The science behind earwax Why do we have it and what happens if we don t clean it out The grossest things people put in their mouths You won t believe some of the things people have swallowed The mysteries of the brain What makes us who we are and what happens when things go wrong The future of medicine What new and exciting ways will we be treating diseases in the future Headwords is a book that will make you laugh cringe and learn all at the same time It s a must read for anyone who loves the human body in all its gross glory If you like this book write a review **Affective Sciences through the Chemical Senses** Géraldine Coppin, Valentina Parma, Bettina M. Pause, 2017-01-13 In people s minds smells flavors and affective phenomena are perceived as closely linked But is it genuinely the case The scientific study of this question is a rapidly expanding field both in healthy and in clinical populations Although still under studied in comparison to other sensory modalities chemical senses have proven to bring unique knowledge in the understanding of affective phenomena In this context this Research Topic is

aimed to offer a snapshot of the present knowledge and questions raised in this field Topics include but are not limited to affects elicited by odors and or flavors in different individuals contexts or cultures emotional potency of odors in guiding human behavior and cognition e g attention memory formation decisions and choices withdrawal and approach behavior affects communicated by body odors affect regulation disorders and chemosensory perception Studies on the biological underpinnings of these effects are also included **The Multisensory Museum** Nina Levent,Alvaro

Pascual-Leone,2014-03-06 Recent research in the cognitive sciences gives us a new perspective on the cognitive and sensory landscape In **The Multisensory Museum** Cross Disciplinary Perspectives on Touch Sound Smell Memory and Space museum expert Nina Levent and Alvaro Pascual Leone professor of neurology at Harvard Medical School bring together scholars and museum practitioners from around the world to highlight new trends and untapped opportunities for using such modalities as scent sound and touch in museums to offer more immersive experiences and diverse sensory engagement for visually and otherwise impaired patrons Visitor studies describe how different personal and group identities color our cultural consumption and might serve as a compass on museum journeys Psychologists and educators look at the creation of memories through different types of sensory engagement with objects and how these memories in turn affect our next cultural experience An anthropological perspective on the history of our multisensory engagement with ritual and art objects especially in cultures that did not privilege sight over other senses allows us a glimpse of what museums might become in the future Education researchers discover museums as unique educational playgrounds that allow for a variety of learning styles active and passive exploration and participatory learning Designers and architects suggest a framework for thinking about design solutions for a museum environment that invites an intuitive multisensory and flexible exploration as well as minimizes physical hurdles While attention has been paid to accessibility for the physically impaired since passage of the Americans with Disabilities Act making buildings accessible is only the first small step in elevating museums to be centers of learning and culture for all members of their communities This landmark book will help all museums go much further

Hansson,2024-08-13 Smell is arguably the least understood sense yet it has always been a vital component of the human experience and that of all living creatures Smell has been used by plants and animals for millions of years to warn to attract to identify to navigate and

even to mislead Smelling to Survive explains some of these fascinating processes and explores how the past would have smelt quite different to our ancestors and how future technologies will further change the world of scents Along the way leading scientist Bill S Hansson recounts amazing stories from the world of olfactory research from the tobacco plant that excretes an alarm odour to mosquitos that cherish the smell of sweaty feet to lilies that imitate the fragrance of a dead horse Hansson explains why scientists are interested in the smell that surrounds teenage males and how climate change affects the smell of our environment He describes research trips to Christmas Island where crabs with particularly keen noses crack coconuts on the beach and outlines studies that reveal how penguins recognize their partner by their scent Born in Sweden the neuroethologist Bill S Hansson served as Vice President of the Max Planck Society and is currently Director of the Max Planck Institute for Chemical Ecology in Jena Germany and an honorary professor at Friedrich Schiller University His research centres on the question of how plants and insects communicate through scent

The Sensational Past: How the Enlightenment Changed the Way We Use Our Senses Carolyn Purnell, 2017-02-07 Sight smell hearing taste and touch as they were celebrated during the Enlightenment and as they are perceived today Blindfolding children from birth Playing a piano made of live cats Using tobacco to cure drowning Wearing flea colored clothes These actions may seem odd to us but in the eighteenth century they made perfect sense As often as we use our senses we rarely stop to think about their place in history But perception is not dependent on the body alone Carolyn Purnell persuasively shows that while our bodies may not change dramatically the way we think about the senses and put them to use has been rather different over the ages Journeying through the past three hundred years Purnell explores how people used their senses in ways that might shock us now And perhaps more surprisingly she shows how many of our own ways of life are a legacy of this earlier time The Sensational Past focuses on the ways in which small peculiar and seemingly unimportant facts open up new ways of thinking about the past You will explore the sensory worlds of the Enlightenment learning how people in the past used their senses understood their bodies and experienced the rapidly shifting world around them In this smart and witty work Purnell reminds us of the value of daily life and the power of the smallest aspects of existence using culinary history fashion medicine music and many other aspects of Enlightenment life

Chemical Signals in Vertebrates 14 Christina D. Buesching, 2019-07-19 In August 2017 the Chemical Signals in Vertebrates CSiV group held its 14th triennial meeting at Cardiff University in Wales This well established international conference brings together leaders and students in the field of olfactory communication and chemical signaling of vertebrates to present new advances in their research as well as synopses of disparate areas under new angles This volume is a collection of the proceedings of this meeting authored by leading experts in this field that covers a wide variety of topics in chemical ecology

The Green Pharmacy Guide to Healing Foods James A. Duke, 2009-06-23 Upon its publication more than a decade ago Dr James Duke s The Green Pharmacy quickly set the standard for consumer herb references A favorite of laypeople and professionals alike the book sold more than a million copies and solidified the author s

reputation as one of the world's foremost authorities on medicinal plants. In *The Green Pharmacy: Guide to Healing Foods*, Dr. Duke turns to the broader and even more popular subject of food as medicine, drawing on more than thirty years of research to identify the most powerful healing foods on earth. Whether he is revealing how to beat high cholesterol with blueberries, combat hot flashes with black beans, bash blood sugar spikes with almonds, or help relieve agonizing back pain with pineapple, Dr. Duke's food remedies help treat and prevent the whole gamut of health concerns, from minor such as sunburn and the common cold to more serious like arthritis and diabetes. Dr. Duke has assigned a rating to each remedy according to his evaluation of the available scientific studies and anecdotal reports. Many of the healing foods recommended here are proving so effective that they may outperform popular pharmaceuticals minus the risk and cost.
