Curtis,2021-12-24 This book explores societal vulnerabilities highlighted within cinema and develops an interpretive
framework for understanding the depiction of societal responses to epidemic disease outbreaks across cinematic history
Drawing on a large database of twentieth and twenty first century films depicting epidemics the study looks into issues
including trust distrust and mistrust different epidemic experiences down the lines of expertise gender and wealth and the
difficulties in visualizing the invisible pathogen on screen The authors argue that epidemics have long been presented in
cinema as forming a point of cohesion for the communities portrayed as individuals and groups from below represented as
characters in these films find solidarity in battling a common enemy of elite institutions and authority figures Throughout the
book a central question is also posed cohesion for whom which sheds light on the fortunes of those characters that are
excluded from these expressions of collective solidarity This book is a valuable reference for scholars and students of film
studies and visual studies as well as academic and general readers interested in topics of films and history and disease and
