Whale-watching James Higham, Lars Bejder, Rob Williams, 2014-03-27 Within little more than a generation whale watching has been subject to global industrial development It has been portrayed by destinations and business operators and advocated by environmental groups as a sustainable activity and an alternative to whaling However in recent years the sustainability of these activities has increasingly been questioned as research shows that repeated disturbance by boat traffic can severely disrupt critical behaviours of cetaceans in the wild Bringing together contributions by international experts this volume addresses complex issues associated with commercial whale watching sustainable development and conservation of the global marine environment It highlights widely expressed concerns for the failure of policy planning and management and pinpoints both long standing and emerging barriers to sustainable practice Featuring numerous case studies the book
