Ancient Egyptian Language and Writing Charles River Editors,2019-09-07 Includes pictures Includes excerpts of ancient accounts Includes a bibliography for further reading Perhaps not surprisingly given how advanced they were in comparison to

contemporaries the Egyptians invented one of the first writing systems ever and for centuries people thought these ancient texts held some sort of secret be it aliens advanced technology lost to the world or mystical cures for all of the world's ills. Even the ancient Egyptians saw their writing systems as full of mystery and hidden knowledge according to Egyptian mythology writing was invented by the ibis-headed god Thoth the most intellectual of the gods. He was a scribe also associated with mathematics medicine and astronomy and could appear as either an ibis or a baboon. Thoth was originally a lunar god strongly associated with recording events and time. He is more commonly known as the scribe who records judgment in the famous weighing of the heart scene in which a person's fate in the afterlife is decided. To the Egyptians writing was a gift of the gods and should be used accordingly. It was powerful and had the ability to create. For example, written formula offerings could provide sustenance in multiple ways including being written, depicting the offerings, and read aloud. Each of these methods brought offerings to the recipient for all of eternity. Speaking words was especially powerful as shown in myths where the gods create in this fashion. One such myth is the Memphite Theology where the creator god Ptah creates other beings through the thoughts of his heart and the words of his mouth. Furthermore, writing a person or a god's name gave them power and erasing their names took the power away. By placing his name on it, a person or king could usurp a statue from someone else. Since writing was hieroglyphic, it was also art and the images held power. This is evidenced by signs or images being disfigured in tombs or funerary settings so as not to hurt the owners. These so-called mutilated signs were often of serpents or other animals that were able to harm the deceased. The signs might also be left incomplete for the same purpose. That being said, real people wrote these texts. Some of the scribes might have considered themselves magicians, but they weren't time travelers, aliens, or gods. Ancient Egyptian writing is often extremely complex and filled with puns, vague statements about religious mysteries, and general witty banter. In addition to those extremely well-written and thought-out texts, there is also a range of personal letters, administrative texts, and even graffiti. When reading some of these texts, it is remarkable how similar the people of ancient Egypt were to people today when it came to their daily concerns and even the jokes they told. The ancient Egyptian language was Afro-Asiatic, distantly related to Semitic and African ones, and the writing system only used consonants and not vowels due to the root system. This is similar to how Arabic or Hebrew is written today. Most words had a root of two or three consonants and the vowels changed based on the form of the word.

Ancient Egyptian Language and Writing: The History and Legacy of Hieroglyphs and Scripts in Ancient Egypt examines the history of writing in Egypt and how it evolved over thousands of years. Along with pictures depicting important people, places, and events, you will learn about Egyptian language and writing like never before. **Hieroglyphs** Norma Jean Katan, Barbara Mintz, 1985. Explains the origins of hieroglyphs and what they mean, tells how this ancient form of writing was decoded, and describes the training and importance of scribes.

HIEROGLYPHS OF THE PHAISTOS DISC: history and full text translation. Vitaly Surnin, 2013-12-28. This book is the preliminary part of a great work titled THE BOOK OF THE EGYPTIAN. The beginning of

the basic Egyptology or a key to the understanding of history philosophy and world religion Usually the introduction is made in the form of a brief preface or foreword but I got a whole book as the first step in a multi volume publication of the study The purpose of this specific introduction as the beginning of serious research is right at the level of the opening to inspire a reader showing him in a clear visual and comprehensible form the whole true mechanism of the hieroglyphic writing To achieve this I will completely dispel the myth created by the modern science that hieroglyphs do not convey any meaning of words the whole idea but only individual sounds letters or their combination syllables This scientific myth will be finally deprived of the status of scientific knowledge and the translation of the Phaistos disc on the contrary will be clearly shown what is called broken apart and will be read in the ancient hieroglyphic language united by the principle of construction in the language of the ancient Egyptians I can say that it will not be two simultaneously existing systems of hieroglyphs translation as well as two Egyptologies one will be false and the other true To prove the validity of the system of translation I wanted to give you immediately not only a complete translation of the text of the Phaistos disc where the number of occurrences of each hieroglyph is not big 1 to 19 times but the translation of the whole ancient Egyptian writing because the number of times it is used in there is thousands if not even millions And each such use of each hieroglyph is translating in the same way so it creates the full reading of the hieroglyphic texts writing which will be easily read by everyone with the dictionary of hieroglyphs in the future The main reason why I wanted to do it is because at first I read the ancient Egyptian texts and only then by chance came across with the hieroglyphs of the Phaistos disc But then I decided to set a different aim to teach the reader to think and not just to read hieroglyphs Since we have no ancient Egyptian temple and you re not its novice the method of achieving the aims will be different than in the antiquity First of all I would suggest not a translation of ancient Egyptian hieroglyphs but a complete translation of the Phaistos disc and at the same time to give them a sort of test of common sense to modern science in the face of particular academies and universities of the world Let them answer me the question not knowing the translations of ancient Egyptian texts whether they think this translation of the Phaistos disc is correct So when I completely publish The Book of Egyptian it will become clear who they are and where do they lead all of you As they always test the students it s a time to test them as well Will they pass the test I do not know but any way you my reader will get to know about it in the main manuscript and will be able to draw your own conclusions about their intellectual level Therefore I recommend you to take this message of the book at least with the attention because not every day the science gets a ready revelation designed in the form of scientific study And here the attention and common sense will help the reader to re look the original pure uncomplicated meaning of the Hieroglyphs which through the veil of delusion will finally begin to appear in their true original and vibrant colors and finally get from the nether world into the realm of the living
