The Hiding House Concept:

Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture Garip, Ervin, Garip, S. Banu, 2020-11-20 Studio environments can be defined as multi dimensional integrated production spaces where basic design trainings take place and where design issues including theoretical notions such as sociological political phenomenological and other dimensions are discussed Present approaches within the literature and social media on this topic gives cause for students to evaluate their future professions over finished and pictorial products rather than ontological and processual means While there are many resources available on the present approaches of aesthetics and visuality of interior spaces there is not much research available on new design methodologies related design processes and new applied methods in interior arcitecture Based on different contexts these methods of design practice have the potential to enrich design processes and create multiple discussion platforms within project studios as well as other design media These different representations and narration methods for research in the context of interior architecture can be effectively used in design processes The Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture proposes new design methodologies and related design processes and introduces new applied method approaches while presenting alternative methods that have been used within design studios in the field of interior architecture The chapters deal with four major sections the design process and interdiciplinary approaches then scenario development and content followed by material texture and atmosphere and concluding with new approaches to design While highlighting topics such as spatial perception design strategies architectural atmosphere and design thinking this book is of interest to architects interior designers practitioners stakeholders researchers academicians and students looking for advanced research on the new design metholodologies and processes for interior architecture Migration, Settlement, and the Concepts of House and Home Iris Levin, 2015-11-19 How do migrants feel at home in their houses Literature on the migrant house and its role in the migrant experience of home building is inadequate This book offers a theoretical framework based on the notion of home building and the concepts of home and house embedded within it It presents innovative research on four groups of migrants who have settled in two metropolitan cities in two periods migrants from Italy migrated in the 1950s and 1960s and from mainland China migrated in the 1990s and 2000s in Melbourne Australia and migrants from Morocco migrated in the 1950s and 1960s and from the former Soviet Union migrated in the 1990s and 2000s in Tel Aviv Israel The analysis draws on qualitative data gathered from forty six in depth interviews with migrants in their home environments including extensive visual data Levin argues that the physical form of the house is meaningful in a range of diverse ways during the process of home building and that each migrant group constructs a distinct form of home building in their homes houses according to their specific circumstances of migration namely the origin country country of destination and period of migration as well as the historical economic and social contexts around migration *Concepts of Space, Ancient and Modern* Kapila

experiences that are designed to stimulate receptive and expressive language building experiences. Additionally, after the easy to follow activity steps, there is a listing of Small Talk Suggestions that is comprised of ideas that teachers can use to encourage conversations between themselves and their preschoolers. In this way, before, during, and after the language activity, the adult is able to provide a rich language model for the young language learner within a natural, meaningful social context. In essence, *Small Talk Activities for Language Development in Preschool Learners* is intended to engage adults and preschoolers in the process of developing age appropriate receptive and expressive language skills while having fun. *The Estate House Re-designed* Anthony Sully, 2018-08-07. The book demonstrates how new houses can be designed to be more sustainable and ergonomic. Specifically, it describes a prototype building that could be constructed in the near future. Responding to some of the poor standards of mass estate housing in the UK and its out of date space standards, it contributes towards improving the current status quo by describing a house design including drawings that can compete with today's mass housing. The author examines the traditional geometrical reliance on the square in the design of houses and the planning of housing estates and promotes instead the adoption of polygonal forms. This is explained using geometric analysis diagrams and references to existing housing. These concepts have been developed with reference to technical literature from various companies, with one company interested in taking it further. Providing a novel and up to date design concept, this book is of value to practitioners and researchers looking to improve the standard of mass housing in the UK. It is also of interest to anyone wishing to build their own house and to manufacturers wanting to move into modern housing technology.

Designing Sustainable Residential and Commercial Interiors Lisa M. Tucker, 2014-09-11. *Designing Sustainable Commercial Interiors: Applying Concepts and Practices* is a core text that teaches students and designers how to apply sustainable principles to all stages of the design process for residential and commercial interiors. An overview of the types of design projects emphasizes a three pronged approach to sustainability: equity, economy, and ecology. Through case studies for a range of project types including retail, healthcare, hospitality, corporate, adaptive reuse, civic, and institutional and residential, readers will learn how to use a sustainable concept as the foundation for well designed projects. *Queering the Gothic* William Hughes, Andrew Smith, 2017-06-01. *Queering the Gothic* is the first multi authored book concerned with the developing interface between Gothic criticism and queer theory. Considering a range of Gothic texts produced between the eighteenth century and the present, the contributors explore the relationship between reading Gothically and reading Queerly, making this collection both an important reassessment of the Gothic tradition and a significant contribution to scholarship on queer theory. Writers discussed include William Beckford, Matthew Lewis, Mary Shelley, George Eliot, George Du Maurier, Oscar Wilde, Eric Count Stenbock, E. M. Forster, Antonia White, Melanie Tem, Poppy Z. Brite, and Will Self. There is also exploration of non text media including an analysis of Michael Jackson's pop videos. Arranged chronologically, the book establishes links between texts and periods and examines how conjunctions of queer, gay, and lesbian can be related to and

are challenged by a Gothic tradition All of the chapters were specially commissioned for the collection and the contributors are drawn from the forefront of academic work in both Gothic and Queer Studies **They Came to Stay** Yvonne Brink,2008-07-01 Massive brickwork resulting in a towering gable hollowing out a hillside in order to achieve a T plan adding a whole new T to the front of an old one in order to avoid ending up with a crooked H plan what did these owners have in mind when investing so much time energy and money in remodelling their farm dwellings to make them comply with certain set patterns The aim of this book is to find answers to this and a number of related questions in an endeavour to discover meaning in Cape colonial architecture through methods that involve more than relying on the study of archival documents only **Geospatial Techniques in Urban Planning** Zhenjiang Shen,2012-01-07 This work presents cases studies of applications of Geotechnology such as Geography Information Systems virtual reality and cellular automaton and multi agent systems in the field of urban planning and design These are joint research presentations with students and colleagues from Kanazawa University All these case studies are about application in Japanese or Chinese cities which are on field examples reflecting the enormous spread of geo computation technology Nevertheless the concepts have wide applicability to other contexts The works can be classified into three types of Geotechnological applications at different levels of urban spaces which are relevant to different kinds of urban planning and development projects The book is comprised of three parts Part 1 Geosimulation and land use plan Part 2 Geo Visualization and urban design Part 3 Geography information system and planning support **Material culture : critical concepts in the social sciences.
