P. Cheremisinoff,Paul N. Cheremisinoff,1995-12-31 The management of hazardous materials and industrial wastes is complex
requiring a high degree of knowledge over very broad technical and legal subject areas Hazardous wastes and materials are
diverse with compositions and properties that not only vary significantly between industries but within industries and indeed
within the complexity of single facilities Proper management not only requires an understanding of the numerous and
complex regulations governing hazardous materials and waste streams but an understanding and knowledge of the treatment
post treatment and waste minimization technologies In fact today s environmental manager must face working within twelve
environmental management arenas all of which may be applicable regardless of the size of the operation or business This
volume has been written as a desk reference for the Professional Hazards Manager PHM The PHM is a qualified
environmental manager that has the responsibility of ensuring that his or her facility or division within the corporation is in
compliance with environmental statutes and regulations as well as participating in the selection of technologies and
approaches to remediation pollution control and in implementing waste minimization practices These decisions require
knowledge and understanding of the federal state and local environmental regulations a working knowledge of the best
available technologies and their associated cost This volume provides an overview of both the technology and compliance
requirements that will assist environmental managers in addressing facility management of hazardous wastes pollution
control and waste minimization The book has been designed in part as a study guide to help prepare qualified individuals for
the national certification and registration program of Professional Hazards Managers conducted by the National Association
of Safety Health Professionals and other organizations including the Hazard Materials Control Resources Institute HMCRI
