Evenett, Shahid Yusuf, 2002-09-27 East Asian economies of the 1980s and much of the 1990s were among the most competitive exporters of manufactured products and were also able to sustain growth

rates far higher than those of other countries developing or industrial. However the economic crisis of 1997-98 impacted the economies of these countries. Although recovery began fairly quickly in some countries others have yet to regain their growth momentum. Can East Asia Compete looks at whether or not East Asia can restore its near magical performance or is its competitive strength beginning to wane. This volume argues that East Asian countries have far from exhausted their growth potential. However future competitiveness will depend on much greater innovative capability in manufacturing and services innovativeness that is grounded in stronger institutions, improved macroeconomic policies and closer regional coordination. Can East Asia Compete clearly summarizes the issues currently being debated and provides guidance to East Asian economies on how to deal with the policy concerns that lie ahead.

The Dynamic American Firm Kenneth Chilton, Murray L. Weidenbaum, Robert Batterson, 2012-12-06 Business is becoming more global, more competitive and more knowledge intensive. Consequently business executives are being required to reexamine and redefine fundamental relationships both intra and inter company. The Dynamic American Firm explores the pivotal factors motivating the organizational changes that are sweeping American business with a particular emphasis on the global marketplace. It provides a critical analysis of the forces that are shaping strategies and structures of American business, emphasizing that the process of adaptation is more important than particular strategies and structures that develop along the way. The authors begin by illustrating the external factors that shape the development of the firm, including a combination of technological advances and increasingly global markets, and proceed to discuss corporate efforts to adapt to this external environment by means of changing relationships with other firms. They pay particular attention to the alliances that help American firms establish a presence in overseas markets, including the roles of mergers, acquisitions, strategic alliances and joint ventures. The book concludes with a discussion of the internal changes taking place in American firms, including shifts in organizational strategy and structure, the elimination of middle management and the development of work teams.

The Economics of Industrial Development John Weiss, 2010-09-13 This book aims to explain this process from the perspective of developing countries. It charts current trends in industrial development, drawing on available statistics and explores different perspectives on the role the manufacturing industry can play.
