Smart Regulation:

Verso la smart regulation in Europa Federico Basile, Fiorenza Barazzoni, 2013

Better Regulation Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union

Understanding Regulation Robert Baldwin, Martin Cave, Martin Lodge, 2011-10-28 Regulation is a key concern of industries consumers citizens and governments alike Building on the success of the first edition *Understanding Regulation* Second Edition provides the reader with an introduction to key debates and discussions in the field of regulation from a number of disciplinary perspectives looking towards law economics business political science sociology and social administration The book has been extensively revised and updated to take into account the significant developments and events of the past decade Containing several new chapters it has been completely restructured into seven parts covering the fundamental issues regarding regulation different types of regulatory strategies rules and enforcement quality and evaluation regulation at different levels of government network issues and concluding thoughts Drawing on cross sectoral and cross national examples this book reviews the central questions of regulation and reflects upon those contentious issues that affect the design and operation of regulatory institutions Amongst other topics it discusses better regulation enforcement self regulation risk regulation cost benefit analysis and more utility regulation oriented topics such as price setting It will be an essential resource for academics researchers and graduates across the social sciences studying regulation

Better Regulation in Europe: Ireland 2010 OECD, 2010-11-02 This report maps and analyses the core issues which together make up effective regulatory management for Ireland laying down a framework of what should be driving regulatory policy and reform in the future

Rules, Rules, Rules, Rules G. Bruce Doern, Robert Johnson, 2006-01-01 *Rules Rules Rules Rules* considers various sectors where rule making spans all or most of the four levels of jurisdiction international federal provincial and city or local in areas such as food safety investment and trade forestry drinking water oil and gas and emergency management

Better Regulation in EU Contract Law Esther van Schagen, Stephen Weatherill, 2019-12-26 This book is the first to provide a critical investigation of EU better regulation from the perspective of EU contract law The Commission's New Deal for EU Consumers is one of the

first EU contract law initiatives to implement both the newly revised Better Regulation Guidelines and the newly introduced combined evaluation of multiple Directives in the form of a fitness check This offers an opportunity to explore difficulties and best practices at a national level as demonstrated by experience with the EU s Unfair Terms Directive Both the fitness check and the impact assessment accompanying the New Deal should facilitate critical reflection on the design of EU contract law This book addresses key questions Do impact assessments favour business interests at the expense of a high level of consumer protection Is the evaluation of EU contract law and the analysis in impact assessments in line with scientific standards Has the fitness check revealed difficulties and success stories with EU measures at national level and thereby facilitated an in depth scrutiny of the design of EU contract law Ultimately is the potential of better regulation being realised

Better Regulation Practices across the European Union OECD,2019-03-19 Laws and regulations affect the daily lives of businesses and citizens High quality laws promote national welfare and growth while badly designed laws hinder growth harm the environment and put the health of citizens at risk This report analyses practices to improve the quality of laws

Innovation in Energy Law and Technology Donald Zillman, Lee Godden, LeRoy Paddock, Martha Roggenkamp,2018-03-09 There are few existential challenges more serious in the twenty first century than energy transition As current trends in energy production prove unsustainable for the environment energy security and economic development innovation becomes imperative Yet with technological challenges come legal challenges Zillman Godden Paddock and Roggenkamp assemble a team of experts in their field to debate how the law may have to adapt to changes in the area What regulatory approach should be used How do we deal with longer term investment horizons and so called stranded assets such as coal fired power stations And can a form of energy justice be achieved which encompasses human rights sustainable development goals and the eradication of energy poverty With a concept as unwieldy as energy innovation it is high time for a text tackling changes which are dynamic and diverse across different communities and which provides a thorough examination of the legal ramifications of the most recent technological changes This book which be of vital importance to lawyers policy makers economists and the general reader

The EU Better Regulation Agenda Sacha Garben, Inge Govaere,2018-05-17 Better Regulation in the EU is a perennial and topical question which has important implications for the future direction of EU law While actions directed at improving the quality and accessibility of EU regulation are not novel in recent years the Better Regulation Agenda has significantly affected the structural organisation and day to day operation of the EU legislative process Yet many questions about the future of the Agenda remain not least in light of Brexit Exploring the Better Regulation Agenda and its relation to the overall EU legal and political order necessitates an integrated interdisciplinary approach This edited volume presents insights from economics political science and legal scholarship Furthermore to allow full understanding it examines institutional practice where the Agenda is made and shaped on a daily basis Hence the book features contributions from the perspective of the work of the main EU institutions the European

Commission the Parliament the Council and the Court of Justice This results in a seminal overview of the subject of interest to scholars and practitioners alike Emissions Trading Schemes Sanja Bogojevic,2013-07-04 Over the last four decades emissions trading has enjoyed a high profile in environmental law scholarship and in environmental law and policy Much of the discussion is promotional preferring emissions trading above other regulatory strategies without however engaging with legal complexities embedded in conceptualising scrutinising and managing emissions trading regimes The combined effect of these debates is to create a perception that emissions trading is a straightforward regulatory strategy imposable across various jurisdictions and environmental settings This book shows that this view is problematic for at least two reasons First emissions trading responds to distinct environmental and non environmental goals including creating profit centres substituting bureaucratic control of resources and ensuring regulatory compliance This is important as the particular purpose entrusted to a given emissions trading regime has as its corollary a particular governance structure according to which the regime may be constructed and managed and which trusts the emissions market the state and rights in emissions allowances with distinct roles Second the governance structures of emissions trading regimes are culture specific which is a significant reminder of the importance of law in understanding not only how emissions trading schemes function but also what meaning is given to them as regulatory strategies This is shown by deconstructing emissions trading discourses that is by inquiring into the assumptions about emissions trading as featuring in emissions trading scholarship and in debates involving law and policymakers and the judiciary at the EU level Ultimately this book makes a strong argument for reconfiguring the common understanding of emissions trading schemes as regulatory strategies and sets out a framework for analysis to sustain that reconfiguration
