Debus, 2014-11-21 Over centuries discoveries of fossil bones spawned legends of monsters such as giants and dragons As the field of earth sciences matured during the 19th century early fossilists gained understanding of prehistoric creatures such as Tyrannosaurus Triceratops and Stegosaurus This historical study examines how these genuine beasts morphed in the public imagination into mythical powerful engines of destruction and harbingers of cataclysm taking their place in popular culture film and literature as symbols of lost worlds where time stands still *Monster! Monster!* Betty Garner, 1995 For centuries man has passed down stories about strange unknown creatures inhabiting the forests lakes and oceans of North America Witnesses have come forth to sign sworn testimonies as to the truth of their reports Films have been offered to authorities as the real thing And yet no carcasses or live specimens have been found the search for proof continues Offering readers of all ages a balance of myth and fact *Monster Monster* Gives the complete story of creatures alleged to exist in North America From pre historic time to the present from sea serpents to Sasquatch the author takes readers on a journey examining the arguments for and against the existence of a whole spectrum of beasts A must read for those who want to know more about monsters real half real or imagined Encyclopedia of Cryptozoology Michael Newton, 2016-10-05 On every continent and in every nation animals

unrecognized by modern science are reported on a daily basis People passionately pursue these creatures the name given to their field of study is cryptozoology Coined in the 1950s the term literally means the science of hidden animals When the International Society of Cryptozoology ISC was formed in 1982 the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur either now or in the past as well as the unknown persistence of presumed extinct animals to the present time or to the recent past what makes an animal of interest to cryptology is that it is unexpected This reference work presents a flesh and blood view of cryptozoology Here 2 744 entries are listed the majority of which each describe one specific creature or type of creature Other entries cover 742 places where unnamed cryptids are said to appear profiles of 77 groups and 112 individuals who have contributed to the field descriptions of objects and events important to the subject and essays on cryptotourism and hoaxes for example Appendices offer a timeline of zoological discoveries annotated lists of movies and television series with cryptozoological themes a list of crypto fiction titles and a list of Internet websites devoted to cryptozoology
