The American Indian Mind in a Linear World Donald L. Fixico, 2024-09-27 Now in its second edition The American Indian

Mind in a Linear World examines the persistence of Native peoples in retaining their own worldviews from the pre-Columbian era into the twenty-first century. The book explores the ways in which Indian people who are close to their cultural traditions think in a circular fashion, understood by relying on visual analysis and making decisions from an Indigenous logic. Yet Comanches have a different reality from Mohawks; Apache ethos is not like that of the Lakotas, and Indian men and women see things differently. How and why is the Native mind different from the western world? Why have white teachers and missionaries tried to change the minds of Native students? The Indian perspective is not wrong; it is simply different and inclusive, another way of looking at the world and universe. This edition updates the discussion with a new chapter on contemporary American Indian intellectualism and further analysis of the preservation of Indigenous traditional knowledge. Approachable and engaging, this volume is a key resource for students and scholars of Native American and Indigenous studies and Indigenous history.

How to Thrive as a Solo Librarian Carol Smallwood, Melissa J. Clapp, 2011-09-16. *How to Thrive as a Solo Librarian* is a compilation of chapters by librarians offering advice to colleagues who must work alone or with very limited help. The contributors come from schools and colleges, special and corporate archives, public libraries, and seasoned LIS faculty across the United States and abroad who are familiar with the vigor, dedication, and creativity necessary for solo librarians. As noted in the Foreword, in many ways solo librarianship demands more communication and collaboration than librarians might experience in larger, multi-employee libraries. Despite the fact that most of the authors are currently working alone in their library or archives, they do not work in a vacuum. These chapters aim to help librarians thrive in the demanding environment that exists for the solo librarian. Topics covered include time management, community involvement, public relations, and marketing, professional development, internet-based ideas, administrative tasks, assessing and moving collections, and general overviews. *How to Thrive as a Solo Librarian* will be useful for all professionals and students in the field of librarianship.

Coming of Age in Chicago Ira Jacknis, Donald McVicker, James Snead, 2016-02. *Coming of Age in Chicago* explores a watershed moment in American anthropology when an unprecedented number of historians and anthropologists of all subfields gathered on the 1893 Chicago Columbian Exposition fairgrounds, drawn together by the fair's focus on Indigenous peoples. Participants included people making a living with their research, sporadic backyard diggers, religiously motivated researchers, and a small group who sought a scientific understanding of the lifeways of Indigenous peoples. At the fair, they set the foundation for anthropological inquiry and redefined the field. At the same time, the American public became aware through their own experiences at the fair of a global humanity with reactions that ranged from revulsion to curiosity, tolerance, and kindness. Curtis M. Hinsley and David R. Wilcox combine primary historical texts, modern essays, and rarely seen images from the period to create a volume essential for understanding the significance of this event. These texts explore the networking of thinkers, planners, dreamers, schemers, and scholars who interacted in a variety of venues to lay the groundwork for museums, academic departments, and expeditions. These new relationships helped shape the

profession and the trajectory of the discipline and they still resonate more than a century later *First Peoples, First Contacts* Jonathan C. H. King, 1999 From the Big Game Hunters who appeared on the continent as far back as 12 000 years ago to the Inuits plying the Alaskan waters today the Native peoples of North America produced a culture remarkable for its vibrancy breadth and diversity and for its survival in the face of almost inconceivable trials This book is at once a history of that culture and a celebration of its splendid variety Rich in historical testimony and anecdotes and lavishly illustrated it weaves a magnificent tapestry of Native American life reaching back to the earliest human records A recognized expert in North American studies Jonathan King interweaves his account with Native histories from the arrival of the first Native Americans by way of what is now Alaska to their later encounters with Europeans on the continent s opposite coast from their exchanges with fur traders to their confrontations with settlers and an ever more voracious American government To illustrate this history King draws on the extensive collections of the British Museum artwork clothing tools and artifacts that demonstrate the wealth of ancient traditions as well as the vitality of contemporary Native culture These illustrations all described in detail form a pictorial document of relations between Europeans and Native American peoples peoples as profoundly different and as deeply related as the Algonquians and the Iroquois the Chumash of California and the Inuipat of Alaska the Cree and the Cherokee from their first contact to their complicated coexistence today Events, Exhibitions, and Programs National Endowment for the Humanities.
