The Hardliners:

The Order of Genocide Scott Straus, 2013-01-19 The Rwandan genocide has become a touchstone for debates about the causes of mass violence and the responsibilities of the international community Yet a number of key questions about this tragedy remain unanswered How did the violence spread from community to community and so rapidly engulf the nation Why did individuals make decisions that led them to take up machetes against their neighbors And what was the logic that drove the campaign of extermination According to Scott Straus a social scientist and former journalist in East Africa for several years who received a Pulitzer Prize nomination for his reporting for the Houston Chronicle many of the widely held beliefs about the causes and course of genocide in Rwanda are incomplete They focus largely on the actions of the ruling elite or the inaction of the international community Considerably less is known about how and why elite decisions became widespread exterminatory violence Challenging the prevailing wisdom Straus provides substantial new evidence about local patterns of violence using original research including the most comprehensive surveys yet undertaken among convicted perpetrators to assess competing theories about the causes and dynamics of the genocide Current interpretations stress three main causes for the genocide ethnic identity ideology and mass media indoctrination in particular the influence of hate radio Straus's research does not deny the importance of ethnicity but he finds that it operated more as a background condition Instead Straus emphasizes fear and intra ethnic intimidation as the primary drivers of the violence A defensive civil war and the assassination of a president created a feeling of acute insecurity Rwanda's unusually effective state was also central as was the country's geography and population density which limited the number of exit options for both victims and perpetrators In conclusion Straus steps back from the particulars of the Rwandan genocide to offer a new dynamic model for understanding other instances of genocide in recent history the Holocaust Armenia Cambodia the Balkans and assessing the future likelihood of such events

The Fall Steven Saxonberg, 2017-07-05 With a foreword by Seymour Lipset Hoover Institution and George Mason University USA The Fall examines one of the twentieth century's great historical puzzles why did the communist led regimes in Eastern Europe collapse so quickly and why was the process of collapse so different from country to country This major study explains why the impetus for change in Poland and Hungary came from the regimes themselves while in Czechoslovakia and East Germany it was mass movements which led to the downfall of the regimes

Selling Intervention and War Jon Western,2021-02-10 Selling Intervention and War examines the competition among foreign policy elites in the executive branch and Congress in winning the hearts and minds of the American public for military intervention The book studies how the president and his supporters organize campaigns for public support for military action According to Jon Western the outcome depends upon information and propaganda advantages media support or opposition the degree of cohesion within the executive branch and the duration of the crisis Also important is whether the American public believes that military threat is credible and victory plausible Not all such campaigns to win public support are successful in some instances foreign policy elites and the president and his advisors have to back off Western uses several modern conflicts including the current one in Iraq as case studies to illustrate the methods involved in selling intervention and war to the American public the decision not to intervene in French Indochina in 1954 the choice to go into Lebanon in 1958 and the more recent military actions in Grenada Somalia Bosnia and Iraq Selling Intervention and War is essential reading for scholars and students of U S foreign policy international security the military and foreign policy and international conflict Toppling Foreign Governments

Melissa Willard-Foster,2019-01-11 In 2011 the United States launched its third regime change attempt in a decade Like earlier targets Libya s Muammar Qaddafi had little hope of defeating the forces stacked against him He seemed to recognize this when calling for a cease fire just after the intervention began But by then the United States had determined it was better to oust him than negotiate and thus backed his opposition The history of foreign imposed regime change is replete with leaders like Qaddafi overthrown after wars they seemed

unlikely to win From the British ouster of Afghanistan's Sher Ali in 1878 to the Soviet overthrow of Hungary's Imre Nagy in 1956 regime change has been imposed on the weak and the friendless In *Toppling Foreign Governments* Melissa Willard Foster explores the question of why stronger nations overthrow governments when they could attain their aims at the bargaining table She identifies a central cause the targeted leader's domestic political vulnerability that not only gives the leader motive to resist a stronger nation's demands making a bargain more difficult to attain but also gives the stronger nation reason to believe that regime change will be comparatively cheap As long as the targeted leader's domestic opposition is willing to collaborate with the foreign power the latter is likely to conclude that ousting the leader is more cost effective than negotiating Willard Foster analyzes 133 instances of regime change ranging from covert operations to major military invasions and spanning over two hundred years She also conducts three in depth case studies that support her contention that domestically and militarily weak leaders appear more costly to coerce than overthrow and as long as they remain ubiquitous foreign imposed regime change is likely to endure

[Chances for Democracy in Europe](#) Mária Bordás, 2023-10-24

At the turn of Twenty First Century no one could have believed that by a decade later the prime minister of Hungary would roughly declare his political and government system as an illiberal democracy *Chances for Democracy in Europe The New Wave of Illiberalism in Post Communist Countries* explores the scenarios of building illiberal democracy as followed by Putin in Russia then how it spread in the post Communist Europe It will be showing how a full born illiberal democracy has unfolded in Hungary since 2010 during the last four Orbán governments and the similarities it shares with the Russian illiberal state If the Treaty of Maastricht that laid down democratic principles of the European Union has the sufficient political and legal tools to enforce them when they are not respected by the member states While the EU failed in this effort with Hungary it seems to be successful of a sort in Poland and Slovenia The author analyses why developed Western European countries with long traditions of democratic traditions and values have been resistant to illiberalism and remained strong liberal democracies but what about the countries without long traditions of democratic values

Russia's Revolution from

Above, 1985-2000 Gordon Hahn, 2018-04-27 The fall of the Soviet communist regime in 1991 offers a challenging contrast to other instances of democratic transition and change in the last decades of the twentieth century The 1991 revolution was neither a peaceful revolution from below as occurred in Czechoslovakia nor a negotiated transition to democracy like those in Poland Hungary or Latin America It was not primarily the result of social modernization the rise of a new middle class or of national liberation movements in the non Russian union republics Instead as Gordon Hahn argues the Russian transformation was a bureaucrat led state based revolution managed by a group of Communist Party functionaries who won control over the Russian Republic RSFSR in the mid 1990s Hahn describes how opportunistic Party and state officials led by Boris Yeltsin defected from the Gorbachev camp and proceeded in 1990 91 to dismantle the institutions that bound state and party These revolutionaries from above seized control of political economic natural and human resources and then separated the party apparatus from state institutions on Russian Republic territory With the failed August 1991 hard line coup Yeltsin banned the Communist Party and decreed that all Union state organs including the KGB and military were under RSFSR control In Hahn's account this mode of revolutionary change from above explains the troubled development of democracy in Russia and the former Soviet republics Hahn shows how limited mobilization of the masses stunted the development of civil societies and the formation of political parties and trade unions with real grass roots The result is a weak society unable to nudge the state to concentrate on institutional reforms society needs for the development of a free polity and economy Russia's Revolution from Above goes far in correcting the historical record and reconceptualizing the Soviet transformation It should be read by historians economists political scientists and Russia area scholars The Ethics of Economic Rationalism John Wright, 2003 This work tackles economic rationalism from a moral perspective Firstly in non technical language it reviews the economic arguments for economic rationalism It then examines the ethical defences for economic rationalism and considers its many criticisms *Religion* Diane Andrews Henningfeld, 2010-02-19 This must have volume explores current trends in religion around the world such as the spread of Pentecostal Christianity a religious revival in China growth of Buddhism in New Zealand and U S efforts toward Jewish Muslim understanding Readers will learn about religion in relation to science education and politics This book also discusses violence and religious practice including China's oppression of Tibetan Buddhists and religious strife in Northern Ireland Stirring essays sources include His Holiness the 14th Dalai Lama the World Council of Churches Christian Conference of Asia and South Asian Councils of Churches *Ideology and Mass Killing* Jonathan Leader Maynard, 2022-05-26 In research on mass killings such as genocides and campaigns of state terror the role of ideology is hotly debated For some scholars ideologies are crucial in providing the extremist goals and hatreds that motivate ideologically committed people to kill But many other scholars are sceptical contending that perpetrators of mass killing rarely seem ideologically committed and that rational self interest or powerful forms of social pressure are more important drivers of violence than ideology In *Ideology and Mass Killing* Jonathan Leader Maynard challenges both these

prevailing views advancing an alternative neo ideological perspective which systematically retheorises the key ideological foundations of large scale violence against civilians Integrating cutting edge research from multiple disciplines including political science political psychology history and sociology Ideology and Mass Killing demonstrates that ideological justifications vitally shape such violence in ways that go beyond deep ideological commitment Most disturbingly of all the key ideological foundations of mass killings are found to lie not in extraordinary political goals or hatreds but in radicalised versions of those conventional widely accepted ideas that underpin the politics of security in ordinary societies across the world This study then substantiates this account by a detailed examination of four contrasting cases of mass killing Stalinist Repression in the Soviet Union between 1930 and 1938 the Allied Bombing Campaign against Germany and Japan in World War II from 1940 to 1945 mass atrocities in the Guatemalan Civil War between 1978 and 1983 and the Rwandan Genocide in 1994 This represents the first volume to offer a dedicated comparative theory of ideology s role in mass killing while also developing a powerful new account of how ideology affects violence and politics more generally

Faces of Internationalism Eugene R. Wittkopf, 1990 In *Faces of Internationalism* Eugene R Wittkopf examines the changing nature of public attitudes toward American foreign policy in the post Vietnam era and the role that public opinion plays in the American foreign policymaking process Drawing on new data four mass and four elite opinion surveys undertaken by the Chicago Council of Foreign Relations from 1974 to 1986 combined with sophisticated analysis techniques Wittkopf offers a pathbreaking study that addresses the central question of the relationship of a democracy to its foreign policy The breakdown of the consensus approach to American foreign policy after the Cold War years has become the subject of much analysis This study contributes to revisionist scholarship by describing the beliefs and preferences that have emerged in the wake of this breakdown Wittkopf counters traditional views by demonstrating the persistence of U S public opinion defined by two dominant and distinct attitudes in the post Vietnam war years cooperative and militant internationalism The author explores the nature of these two faces of internationalism focusing on the extent to which elites and masses share similar opinions and the political and sociodemographic correlates of belief systems Wittkopf also offers an original examination of the relationship between beliefs and preferences

China's Tibet Policy Dawa Norbu, 2001-09-27 This major study analyses the traditional modes of Sino Tibetan relations in order to unearth general patterns beyond partisan points of view It sheds light on contemporary issues in the Sino Tibetan dialogue and discerns possible future structures for conflict resolution in occupied Tibet With its economic reforms China is changing and will ch

Brazilian Propaganda Nina Schneider, 2019-04-17 In *Brazilian Propaganda* Nina Schneider examines the various modes of official and unofficial propaganda used by an authoritarian regime Such propaganda is commonly believed to be political praising military figures and openly legitimizing state repression However Brazil s military dictatorship 1964 1985 launched seemingly apolitical official campaigns that were aesthetically appealing and ostensibly aimed to enlighten and civilize Some were produced as civilian military collaborations

and others were conducted by privately owned media but undergirding them all was the theme of a country aspiring to become a developed nation Focusing primarily on visual media Schneider demonstrates how many short films of the period portrayed a society free from class and racial conflicts These films espoused civic mindedness while attempting to distract from atrocities perpetuated by the regime Mining a rich trove of materials from the National Archives in Rio and conducting interviews with key propagandists Schneider demonstrates the ambiguities of twentieth century Brazilian propaganda She also challenges the notion of a homogeneous military regime in Brazil highlighting its fractures and competing forces By analyzing the strategy production mechanisms and meaning of these films and reconstructing their effects she provides an alternative interpretation of the propagandists intentions and a new framework for understanding this era in Brazil s history

Saleh,2013-07-17 While the Islamic Republic has employed various strategies to mitigate the worst excesses of inter ethnic tension while still securing a Shi a dominated Persian hegemony the systematic neglect of ethnic groups by both the Islamic Republic and its predecessor regime has resulted in the politicization of ethnic identity in Iran The Historiography of

Sanford,John Docker,Robert Hitchcock,2008-02-13 The Historiography of Genocide is an indispensable guide to the development of the emerging discipline of genocide studies and the only available assessment of the historical literature pertaining to genocides **The Feathers of Condor** Fernando López,2016-08-17 On 25 November 1975 representatives of

five South American intelligence services held a secret meeting in the city of Santiago Chile At the end of the gathering the participating delegations agreed to launch Operation Condor under the pretext of coordinating counterinsurgency activities sharing information to combat leftist guerrillas and stopping an alleged advance of Marxism in the region Condor however went much further than mere exchanges of information between neighbours It was a plan to transnationalize state terrorism beyond South America This book identifies the reasons why the South American military regimes chose this strategic path at a time when most revolutionary movements in the region were defeated in the process of leaving behind armed struggle and resuming the political path One of Condor s most intriguing features was the level of cooperation achieved by these governments considering the distrust animosity and historical rivalries between these countries armed forces This book explores these differences and goes further than previous lines of inquiry which have focused predominantly on the conflict between Latin American leftist guerrillas and the armed forces to study the contribution made by other actors such as civilian anticommunist figures and organizations and the activities conducted by politically active exiles and their supporters in numerous countries This broader approach confirms that the South American dictatorships launched the Condor Plan to systematically eliminate any kind of opposition especially key figures and groups involved in the denunciation of the regimes
