The Headshrinkers Test:

The Man Who Tested Parachutes Andrew Colley, John Neil, 2025-05-30 Charles Agate's daring parachute testing at RAF Ringway transformed airborne warfare while his post war struggles reveal a complex legacy By 1940 the Allies had fallen behind the Axis powers in parachute design and research Other than as a means of escape from a doomed aircraft the British regarded parachuting as of little military value All that changed when the Germans used paratroops the Fallschirmjäger to devastating effect in the invasion of the Low Countries and Churchill demanded immediate action The call went out for men who would be prepared to risk their lives testing parachutes jumping and landing techniques Charles Agate was a 34 year old schoolteacher with a taste for adventure when he joined a pioneering group of mavericks at RAF Ringway in Manchester The breath taking risks they took alongside the essential work of the women of the WAAF changed the course of the war and the face of airborne warfare Their work though often came at a terrible cost Between 1941 and 1945 Agate and his fellow Parachute Jump Instructors PJIs completed thousands of jumps often from low altitude or using prototype parachutes They jumped carrying heavy kit bags had sandbags strapped to their legs and landed in deep freezing water They also trained thousands of raw recruits for the key airborne operations of the war as well as over 600 Special Operation Executive agents for dropping into enemy territory frequently accompanying them as dispatchers on these hazardous flights They were proud of the knowledge they were acquiring and imparting at Ringway but as the authors reveal this led to disputes with the Americans over tactics and equipment as they prepared for the Allied invasion of France Agate amassed a record 1 601 jumps and was awarded the Air Force Cross He and his fellow PJIs at Ringway were also personally thanked by Churchill for their unique contribution to the war effort His last jump in 1946 with his flying suit stuffed with winnings won on a horse called Airborne at the Epsom Derby was reported in the press worldwide He acknowledged after the war that he had seen 21 good soldiers hit the deck during training at RAF Ringway and these tragedies as well as the effects of risking his life on a daily basis took a heavy emotional toll on him and many of the other PJIs *The Man Who Tested Parachutes* explores Agate's lost post war years his struggles with his mental health and the impact on his family It charts his journey to becoming the unconventional head teacher of a village school and his clashes with local authorities Finally it describes unflinchingly the last dark twist in the life of this complex man alone in his flat overlooking the sea just before Christmas 1986 This book tells the story of an ordinary man who took extraordinary risks and the men and women who served alongside him It also remembers the young recruits who died before they were able to take part in the key battles for which they were being trained

Fallen Astronauts Colin Burgess, Kate Doolan, Bert Vis, 2016 Near the end of the Apollo 15 mission David Scott and fellow moonwalker James Irwin conducted a secret ceremony unsanctioned by NASA they placed on the lunar soil a small tin figurine called The Fallen Astronaut along with a plaque bearing a list of names By telling the stories of those sixteen astronauts and cosmonauts who died in the quest to reach the moon between 1962 and 1972 this book enriches the saga of

humankind's greatest scientific undertaking Project Apollo and conveys the human cost of the space race. Many people are aware of the first manned Apollo mission in which Gus Grissom, Ed White, and Roger Chaffee lost their lives in a fire during a ground test, but few know of the other five fallen astronauts whose stories this book tells as well, including Ted Freeman and C. C. Williams who died in the crashes of their T-38 jets, the Gemini Twins Charlie Bassett and Elliot See killed when their jet slammed into the building where their Gemini capsule was undergoing final construction, and Ed Givens whose fatal car crash has until now been obscured by rumors. Supported by extensive interviews and archival material, the extraordinary lives and accomplishments of these and other fallen astronauts, including eight Russian cosmonauts who lost their lives during training, unfold here in intimate and compelling detail. Their stories return us to a stirring time in the history of our nation and remind us of the cost of fulfilling our dreams. This revised edition includes expanded and revised biographies and additional photographs.

Cruel Biology one-shot Christopher Sebela, 2012-01-18. From the pages of the Eisner and Harvey Award-winning Dark Horse Presents. By the writer of the Eisner-nominated *High Crimes*, Christopher Sebela, *Dead Letters*, *High Crimes*, and Brian Churilla, *Hellbreak*, craft a horror tale of outbreak and infection set on a remote Pacific island during World War II. Three US soldiers tasked with spotting Japanese bombers run afoul of a mysterious balloon, and all hell breaks loose on their small island home as it erupts in madness. Contains the entirety of *Cruel Biology* from *Dark Horse Presents*. Vol 2 33-36.

Calculated Risk George Leopold, 2016. Unlike other American astronauts, Virgil I. Gus Grissom never had the chance to publish his memoirs, save for an account of his role in the Gemini program before the tragic launch pad fire on January 27, 1967, which took his life and those of Edward White and Roger Chaffee. The international prestige of winning the Moon Race cannot be understated, and Grissom played a pivotal and enduring role in securing that legacy for the United States. Indeed, Grissom was first and foremost a Cold Warrior, a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union to the moon. Drawing on extensive interviews with fellow astronauts, NASA engineers, family members, and friends of Gus Grissom, George Leopold delivers a comprehensive survey of Grissom's life that places his career in the context of the Cold War and the history of human spaceflight. *Calculated Risk: The Supersonic Life and Times of Gus Grissom* adds significantly to our understanding of that tumultuous period in American history.
