Lansdown, 2010-05-07 Silver in healthcare has many different facets and since the early concepts of microbiology of the 1880 s has been developed from usage in surgical clips staples foil wound dressings and surgical implants to the widespread and clinically effective antiseptic wound dressings sutures catheters bone and dental implants and cardiovascular devices of today From the dawn of human civilisation silver has had a role of water purification and even now has a role in hospital water systems for control of MRSA and legionnaires disease Biotechnological

advances in recent years have extended the antimicrobial properties of silver into production of hygiene textiles and use in domestic products. Important advances have been made in understanding mechanisms of antimicrobial action of silver, the central importance of ionisation patterns in the presence of body fluids and secretion and the genetical and molecular profiles of silver resistance. This publication is a comprehensive account of the history of silver in medicine, its clinical benefits and wide advantages as a broad spectrum antimicrobial agent. It is clear from the extensive array of publications in recognised and unofficial press that many misconceptions and misleading conceptions have been perpetuated leading to errors in evaluation of the safety of the metal in occupational, domestic and therapeutic situations. The book is unique in that it is the only comprehensive presentation of the toxicology of silver and it identifies the major misconceptions in the safety of silver and interpretation of argyria and argyrosis as central features of silver toxicity. In this book Dr Lansdown reviews the literature from a clinical and experimental viewpoint with the benefit of his many years' research on silver and experience gained in working with clinicians, healthcare product manufacturers and microbiologists. There is also discussion in the book on the relevance of antimicrobial resistance to silver and deficiencies in present day clinical practice in not evaluating incidences of resistance on a routine basis. The subject matter is presented in a readable fashion and includes reference to use of the metal in such practices as acupuncture and treatment of tropical diseases as practised in some parts of the world, each of which is accompanied by special clinical risk. It is also a collation of current views on the use and efficacy of silver as a broad spectrum antibiotic. The chapters which deal specifically with toxicological aspects of silver in clinical, occupational and environmental issues are central to the book's value. The book is aimed at clinicians, research scientists and product manufacturers and will provide ideas for new research and academic endeavour. It is also essential reading for research students with an interest in metal toxicity and its management in mammalian tissues.

The Book of Skin Steven Connor, 2004. Skin, Steven Connor argues, has never been more visible. *The Book of Skin* explores the multiple functions of the skin in the cultures of the West. In this vividly illustrated book, Connor draws on evidence from a variety of sources including literary and other forms of public and private writing, especially medical texts as well as painting, photography and film, folklore and popular song. Because of its newfound visibility, skin has never been at once so manifest and so in jeopardy as it is today. This dilemma becomes evident in Connor's view if we examine how skin is displayed and manipulated as a site of inscription. In order to trace our culture's anxious concerns with the materiality and mortality of skin, Connor's analysis ranges from the human body itself to photography from Medieval leprosy, Renaissance flaying and eternal syphilis to cosmetics, plastic surgery and skin cancers. Connor examines the chromatics of skin color and pigmentation: blushing, suntanning, paleness, darkening, tattooing, cutting. The Turin shroud, the Mummy and the Invisible Man. He also offers engaging explanations for why particular colors are ascribed to feelings and conditions: such as green for envy, purple for rage and yellow for cowardice. Connor's insights into the obvious and yet unfamiliar terrain of the skin and its place in Western culture
