Britain Ian Carter, 2001 The 19th century steam railway epitomized modernity s relentlessly onrushing advance Ian Carter delves into the cultural impact of the train Why for example did Britain possess no great railway novel He compares fiction and images by canonical British figures Turner Dickens Arnold Bennett with selected French and Russian competitors Tolstoy Zola Monet Manet He argues that while high cultural work on the British steam railway is thin British popular culture did not ignore it Detailed discussions of comic fiction crime fiction and cartoons reveal a popular fascination with railways tumbling from vast and hitherto unexplored stores of critically overlooked genres Gothic Travel through Haunted

Landscapes Lucie Armitt, Scott Brewster, 2022-12-06 This book argues that the process and experience of travel in Gothic literature provides a unique and transformative perspective on the relationship between fear and recurring cultural preoccupations from the late eighteenth century to the present ranging from concerns about climate change or the presence of the unseen to the negotiation of cultural difference and the apprehension produced by various modes of modern transport and unknown unknowable terrain The book follows travellers who take many fictional forms tourists commuters walkers explorers as well as the armchair tourist or reader as they encounter fascinating strange and often disconcerting weathers climates landscapes and topographies Gothic travel epitomises the wonder excitement suspicion or incomprehension that arises from journeys through familiar and unfamiliar terrain While exposure to the wild elemental or primitive could produce the elevation of the sublime in early Gothic increasingly the experience of travel raised unsettling questions about people places and environments that lay beyond established frames of knowledge Gothic travellers are haunted never alone and the

experience of journeying through these landscapes provokes fears that may shadow them even after they have returned to home ground. *Climates of Fear* reveals the persistent ways in which Gothic narratives of travel confront fears about the environment, surveillance, migration and the foreign. These abiding concerns speak loudly to the present time, however, when the encroachments on our immediate surroundings from climate change, digital communication and geopolitical dislocation seem at once remote and intimate, invisible yet urgent. Thus the book also asks whether recent portrayals of Gothic journeys now pose different questions to the reader.

Teaching the Gothic A. Powell, A. Smith, 2006-03-21 *Teaching the Gothic* provides a clear and accessible account of how scholarship on the Gothic has influenced the way in which the Gothic is taught. The book examines a range of topics including Gothic criticism, Theory, Romantic Gothic, Victorian Gothic, Female Gothic, Gothic Sexualities, Gothic Film and Postgraduate developments.

AUDINT#Unsound:Undead Steve Goodman, Toby Heys, Eleni Ikoniadou, 2019-06-18 *Tracing the the potential of sound, infrasound and ultrasound to access anomalous zones of transmission between the realms of the living and the dead.* For as long as recording and communications technologies have existed, operators have evoked the potential of sound, infrasound and ultrasound to access anomalous zones of transmission between the realms of the living and the dead. In *Unsound Undead*, contributors from a variety of disciplines chart these undead zones, mapping out a nonlinear timeline populated by sonic events stretching from the 8th century BC, the song of the Sirens, to 2013 acoustic levitation, with a speculative extension into 2057, the emergence of holographic and holosonic phenomena. For the past seven years, the AUDINT group has been researching peripheral sonic perception, unsound and the ways in which frequencies are utilized to modulate our understanding of presence, non-presence, entertainment, torture and ultimately life and death. Concurrently, themes of hauntology have inflected the musical zeitgeist, resonating with the notion of a general cultural malaise and a reinvestment in traces of lost futures inhabiting the present. This undead culture has already spawned a Lazarus economy in which Tupac ODB and Eazy E are digitally revived as laser-lit holograms. The obscure, otherworldly dimensions of sound have also been explored in the sonic fictions produced by the likes of Drexciya, Sun Ra and Underground Resistance, where hauntology is virtually extended, the future appears in the cracks of the present. The contributions to this volume reveal how the sonic nurtures new dimensions in which the real and the imagined, fictional, hyperstitional, speculative bleed into one another, where actual sonic events collide with spatiotemporal anomalies and time-travelling entities, and where the unsound serves to summon the undead.
