Rogers describes it the world's best market Price development of selected commodities in 2009 The previously mentioned excessive media coverage is the consequence of apparently infinite price increases of the much noticed commodities gold and crude oil The spot price for gold for example has reached a new all time high in November 2009 with over 1100 USD oz and a price increase of 50% in 12 months The spot price for Brent crude oil has approximately doubled in the same period of time from around 38 USD bbl at the end of December 2008 to 78 USD bbl in November 2009 Therewith the spot price for one barrel of Brent crude oil has only reached 50% of its peak price on 7th of June 2008 Back then crude oil cost 145.16 USD bbl Such performances and prospects for further price increases arouse interest in the mass market and move commodity investments into the focus of all kind of investors Indeed investment in the asset class commodities has always been profitable for investors as they have usually achieved a higher rate of return in the past as well as in the year 2009 compared to benchmark investments like the German index of leading shares DAX see Table A Spot prices for Gold Crude Oil vs Benchmark DAX from Nov 2008 Nov 2009 At the same time commodity investments have been underrepresented in most portfolios of private investors What happened before 2009 Before the outbreak of the financial crisis in 2008 the increasing demand
