*Cancer Chemotherapy in Small Animal Practice* Jane Dobson, Neil T. Gorman, 1993-12-08 Cancer chemotherapy is an important new and growing area of veterinary medicine Many practitioners are regularly using cytotoxic drugs for cancer therapy as diagnosis of the condition is relatively straightforward However the theory behind the use of these potent drugs is poorly understood and few practitioners have any training in this area This book is the first to provide comprehensive coverage of the subject Using text notes and tabulated information it provides a highly practical guide to the correct treatment of tumours and the pharmacology behind the use of cytotoxic drugs After considering the basic principles of tumour biology and the application of cytotoxic drugs the book reviews the mode of action of the most frequently used groups of cytotoxic drugs This is supported by comprehensive tables detailing specific agents trade names indications of dose rates and toxicity
