brilliant mirrors forty one chapters including forty two discourses even when looked in casually provide us with unexpected insights and various perspectives Sh ichi Saeki 1922 2016 was Professor Emeritus the University of Tokyo T ru Haga 1931 2020 was Professor Emeritus International Research Center for Japanese Studies New Essays in Japanese Aesthetics A. Irresistible Joshua Paul Dale, 2023-10-26 Why are some things cute and others not What happens to our brains when we see something cute And how did cuteness go global from Hello Kitty to Disney characters Cuteness is an area where culture and biology get tangled up Seeing a cute animal triggers some of the most powerful psychological instincts we have the ones that elicit our care and protection but there is a deeper story behind the broad appeal of Japanese cats and saccharine greetings cards Joshua Paul Dale a pioneer in the burgeoning field of cuteness studies explains how the cute aesthetic spread around the globe from pop brands to Lolita fashion kids cartoons and the unstoppable rise of Hello Kitty Irresistible delves into the surprisingly ancient origins of Japan s kawaii culture and uncovers the cross cultural pollination of the globalised world If adorable things really do rewire our brains it can help answer some of the biggest questions we have about our evolutionary history and the mysterious origins of animal domestication This is the fascinating cultural history of cuteness and a revealing look at how our most powerful psychological impulses have remade global style and culture Between Reason and Experience Andrew Feenberg, 2010-04-09 A leading philosopher of technology calls for the democratic

coordination of technical rationality with everyday experience The technologies markets and administrations of today s knowledge society are in crisis We face recurring disasters in every domain climate change energy shortages economic meltdown The system is broken despite everything the technocrats claim to know about science technology and economics These problems are exacerbated by the fact that today powerful technologies have unforeseen effects that disrupt everyday life the new masters of technology are not restrained by the lessons of experience and accelerate change to the point where society is in constant turmoil In *Between Reason and Experience* leading philosopher of technology Andrew Feenberg makes a case for the interdependence of reason scientific knowledge technical rationality and experience Feenberg examines different aspects of the tangled relationship between technology and society from the perspective of critical theory of technology an approach he has pioneered over the past twenty years Feenberg points to two examples of democratic interventions into technology the Internet in which user initiative has influenced design and the environmental movement in which science coordinates with protest and policy He examines methodological applications of critical theory of technology to the case of the French Minitel computing network and to the relationship between national culture and technology in Japan Finally Feenberg considers the philosophies of technology of Heidegger Habermas Latour and Marcuse The gradual extension of democracy into the technical sphere Feenberg argues is one of the great political transformations of our time

The Culture of Copying in Japan Rupert Cox, 2007-09-12 This book challenges the perception of Japan as a copying culture through a series of detailed ethnographic and historical case studies It addresses a question about why the West has had such a fascination for the adeptness with which the Japanese apparently assimilate all things foreign and at the same time such a fear of their skill at artificially remaking and automating the world around them Countering the idea of a Japan that deviously or ingenuously copies others it elucidates the history of creative exchanges with the outside world and the particular myths philosophies and concepts which are emblematic of the origins and originality of copying in Japan The volume demonstrates the diversity and creativity of copying in the Japanese context through the translation of a series of otherwise loosely related ideas and concepts into objects images texts and practices of reproduction which include shamanic theatre puppetry tea utensils Kyoto town houses architectural models genres of painting calligraphy and poetry sample food displays and the fashion and car industries *Thriving on Chaos* Tom Peters, 1988-11-30 The national bestseller that offers prescriptions for an economic world turned upside down A New York Times bestseller for eleven months **An**
