**Class in America** Paul Carrington, Trina Jones, 2006-06 In *Law and Class in America* a group of leading legal scholars reflect on the state of the law from the end of the Cold War to the present grappling with a central question posed to them by Paul D Carrington and Trina Jones have recent legal reforms exacerbated class differences in America In a substantive introduction Carrington and Jones assert that legal changes from the late 20th century onward have been increasingly elitist and unconcerned with the lives of poor people having little access to the legal system Contributors use this position as a springboard to review developments in their own particular fields and to assess whether or not legal decisions and processes have contributed to a widening gap between privileged and unprivileged people in this country From antitrust and bankruptcy to tax and election law the essays in this unique volume invite readers to reflect thoughtfully on socio economic justice in the new century and suggest that a lack of progressive reform in all areas of law may herald a form of undiagnosed class dominance reminiscent of America's Gilded Age Contributors Margaret A Berger M Gregg Bloche David L Callies Paul D Carrington Paul Y K Castle Lance Compa James D Cox Paula A Franzese Marc Galanter Julius G Getman Lawrence O Gostin Joel F Handler Trina Jones Thomas E Kauper Sanford Levinson John Linehan Joseph D McNamara Burt Neuborne Jeffrey O Connell Judith Resnik Richard L Schmalbeck Danielle Sarah Seiden Richard E Speidel Gerald Torres David M Trubek Elizabeth Warren and Lawrence A Zelenak

**American Biodefense** Frank L. Smith III, 2014-09-19 Biological weapons have threatened U S national security since at least World War II Historically however the U S military has neglected research development acquisition and doctrine for biodefense Following September 11 and the anthrax letters of 2001 the United States started spending billions of dollars per year on medical countermeasures and biological detection systems But most of this funding now comes from the Department of Health and Human Services rather than the Department of Defense Why has the U S military neglected biodefense and allowed civilian organizations to take the lead in defending the country against biological attacks In American Biodefense Frank L Smith III addresses this puzzling and largely untold story about science technology and national security Smith argues that organizational frames and stereotypes have caused both military neglect and the rise of civilian biodefense In the armed services influential ideas about kinetic warfare have undermined defense against biological warfare The influence of these ideas on science and technology challenges the conventional wisdom that national security policy is driven by threats or bureaucratic interests Given the ideas at work inside the U S military Smith explains how the lessons learned from biodefense can help solve other important problems that range from radiation weapons to cyber attacks **American Anthrax** Jeanne Guillemin, 2024-03-26 From Jeanne Guillemin one of the world s leading experts on anthrax and bioterrorism the definitive account of the anthrax investigation It was the most complex case in FBI history In what became a seven year

investigation that began shortly after 9 11 with America reeling from the terror attacks of al Qaeda virulent anthrax spores sent through the mail killed Bob Stevens a Florida tabloid photo editor His death and days later the discovery in New York and Washington D C of letters filled with anthrax sent shock waves through the nation Federal agencies were blindsided by the attacks which eventually killed five people Taken off guard the FBI struggled to combine on the ground criminal investigation with progress in advanced bioforensic analyses of the letters contents While the criminal eluded justice disinformation swirled around the letters erroneously linking them to Iraq s WMD threat and foreign bioterrorism Without oversight billions were lavished on biomedical defenses against anthrax and other exotic diseases Worst of all faith in federal justice faltered American Anthrax is a gripping tale of terror intrigue madness and cover up Regulating Risks in the European Union Maria Weimer,Anniek de Ruijter,2017-10-05 A growing body of EU law and regulation is preoccupied with the protection of EU citizens from health and environmental risks Which chemicals are safe and should be allowed on the market How should the EU respond to public health emergencies such as Ebola and other infectious diseases Regulatory responses to these questions confront deep uncertainty limited knowledge and societal contestation In a time where the use of scientific expertise in EU policy making is particularly contested this book offers a timely contribution to both the academic and policy debate on the role of specialised expertise in EU public decision making on risk and technology as well as on its intertwinement with executive power It draws on insights from law governance political sciences and science and technology studies bringing together leading scholars in this field Contributions are drawn together by a shared theoretical perspective namely by their use of co production as an analytical lens to study the intricate interplay between techno scientific expertise and EU executive power By so doing this collection produces highly original insights into the development of the EU administrative state as well as into the role of regulatory science in its construction This book will be useful to scholars practitioners and policy makers working on risk regulation and the role of expertise in public decision making
