Handbook of Research on Mathematical Modeling for Smart Healthcare Systems Samanta, Debabrata, Singh, Debabrata, 2022-06-24 Advances in healthcare technologies have offered real time guidance and technical assistance for diagnosis monitoring operation and interventions The development of artificial intelligence machine learning internet of things technology and smart computing techniques are crucial in today s healthcare environment as they provide frictionless and transparent financial transactions and improve the overall healthcare experience This in turn has far reaching effects on economic psychological educational and organizational improvements in the way we work teach learn and provide care These advances must be studied further in order to ensure they are adapted and utilized appropriately The Handbook of Research on Mathematical Modeling for Smart Healthcare Systems presents the latest research findings ideas innovations developments and applications in the field of modeling for healthcare systems Furthermore it presents the application of innovative techniques to complex problems in the case of healthcare Covering a range of topics such as artificial intelligence deep learning and personalized healthcare services this reference work is crucial for engineers healthcare professionals researchers academicians scholars practitioners instructors and students

The Smart IoT Blueprint: Engineering a Connected Future Fadi Al-Turjman, 2024-08-13 This book offers a comprehensive exploration of the Smart Internet of Things IoT and its profound impact on our interconnected world From its foundational principles to cutting edge applications Innovative Integration Crafting the World with Smart IoT is a definitive guide to understanding and harnessing the power of IoT technologies In this era of digital transformation IoT has emerged as a transformative force revolutionizing industries urban landscapes and our daily lives This book dives deep into the core concepts of IoT unraveling the intricate web of sensors networks and protocols that underpin this technology Readers will gain a clear understanding of how data intelligence drives IoT making it a driving force behind automation efficiency and sustainability One of the critical aspects addressed is security and privacy in the IoT ecosystem a concern that resonates with individuals businesses and policy makers alike We delve into the ethical dimensions of IoT exploring the responsible use of data in an increasingly connected world Through a series of real world case studies we showcase the practical applications of IoT from smart homes and cities to industrial settings and healthcare The book equips readers with the knowledge needed to navigate this transformative landscape empowering them to make informed decisions in their professional and personal endeavors IoT and the Horizon of Integration provides a glimpse into the future offering insights into emerging trends and predictions in the world of IoT It is a must read for academics researchers and industry professionals in computer science engineering and data analytics Additionally it serves as a valuable resource for policy makers urban planners and graduate level students seeking to grasp the potential and challenges of IoT

Get Smart! Gaurav Bhatnagar, 2008-12-17 Get Smart is the new mantra for students With a systematic back to the basics approach the books in this series aim to help students tackle crucial subjects in school

with confidence and enjoyment Accompanied by tables illustrations and many exciting exercises the Get Smart series gives helpful tips and sensible advice so that students can develop both creative and analytical skills Get Smart Study Smarter is a unique guide for students that illustrates the best methods to adopt while doing school work It examines various aspects of learning and gives practical suggestions on how to Manage your study time better Understand and learn your lessons efficiently using methods like SQ3R Enhance your memory with memory aids like Acronyms Acrostics Rhymes Associations Prepare for exams And for those who feel that life is all about books and lessons Study Smarter gives ideas on what to do to unwind in the spare hours Filled with helpful examples study plans timetables and charts and packed with exciting trivia this book aims to help students lead a well rounded school life Age group of target audience Puffin 12 *S. Chand's Smart Maths book 8* Sheela Khandelwall, S Chand s Smart Maths is a carefully graded Mathematics series of 9 books for the children of KG to Class 8 The series adheres to the National Curriculum Framework and the books have been designed in accordance with the latest guidelines laid down by the NCERT Modern Mathematical Methods For Scientists And Engineers: A Street-smart Introduction Athanassios Fokas, Efthimios Kaxiras, 2022-12-12 Modern Mathematical Methods for Scientists and Engineers is a modern introduction to basic topics in mathematics at the undergraduate level with emphasis on explanations and applications to real life problems There is also an Application section at the end of each chapter with topics drawn from a variety of areas including neural networks fluid dynamics and the behavior of put and call options in financial markets The book presents several modern important and computationally efficient topics including feedforward neural networks wavelets generalized functions stochastic optimization methods and numerical methods A unique and novel feature of the book is the introduction of a recently developed method for solving partial differential equations PDEs called the unified transform PDEs are the mathematical cornerstone for describing an astonishingly wide range of phenomena from quantum mechanics to ocean waves to the diffusion of heat in matter and the behavior of financial markets Despite the efforts of many famous mathematicians physicists and engineers the solution of partial differential equations remains a challenge The unified transform greatly facilitates this task For example two and a half centuries after Jean d Alembert formulated the wave equation and presented a solution for solving a simple problem for this equation the unified transform derives in a simple manner a generalization of the d Alembert solution valid for general boundary value problems Moreover two centuries after Joseph Fourier introduced the classical tool of the Fourier series for solving the heat equation the unified transform constructs a new solution to this ubiquitous PDE with important analytical and numerical advantages in comparison to the classical solutions The authors present the unified transform pedagogically building all the necessary background including functions of real and of complex variables and the Fourier transform illustrating the method with numerous examples Broad in scope but pedagogical in style and content the book is an introduction to powerful mathematical concepts and modern tools for students in science and engineering Smart City and Informatization Guojun

Wang,Abdulmotaleb El Saddik,Xuejia Lai,Gregorio Martinez Perez,Kim-Kwang Raymond Choo,2019-11-05 This book constitutes the refereed proceedings of the 7th International Conference on Smart City and Informatization iSCI 2019 held in Guangzhou China in November 2019 The volume presents 52 full papers which were carefully reviewed and selected from 139 submissions The papers are organized in topical sections on Internet of Things IoT and smart sensing urban computing and big data smart society informatization technologies cloud edge fog computing for smart city applications for smart city informatization assistive engineering and information technology cyberspace security blockchain and applications

Children's Books in Print, 2007 ,2006 Big Data Analytics for Cyber-Physical System in Smart City Mohammed Atiquzzaman,Neil Yen,Zheng Xu,2020-12-17 This book gathers a selection of peer reviewed papers presented at the second Big Data Analytics for Cyber Physical System in Smart City BDCPS 2020 conference held in Shanghai China on 28 29 December 2020 The contributions prepared by an international team of scientists and engineers cover the latest advances made in the field of machine learning and big data analytics methods and approaches for the data driven co design of communication computing and control for smart cities Given its scope it offers a valuable resource for all researchers and professionals interested in big data smart cities and cyber physical systems *Smart Antennas* T. K. Sarkar,Michael C. Wicks,Magdalena Salazar-Palma,Robert J. Bonneau,2005-02-18 A valuable addition to the Wiley Series in Microwave and Optical Engineering Today s modern wireless mobile communications depend on adaptive smart antennas to provide maximum range and clarity With the recent explosive growth of wireless applications smart antenna technology has achieved widespread commercial and military applications The only book available on the topic of adaptive antennas using digital technology this text reflects the latest developments in smart antenna technology and offers timely information on fundamentals as well as new adaptive techniques developed by the authors Coupling electromagnetic aspects of antenna design with signal processing techniques designed to promote accurate and efficient information exchange the text presents various mechanisms for characterizing signal path loss associated with signal propagation particularly for mobile wireless communications systems based on such techniques as joint space frequency adaptive processing In clear accessible language the authors explain the difference between adaptive antennas and adaptive signal processing Illustrate the procedures for adaptive processing using directive elements in a conformal array clarify multistage analysis procedure which combines electromagnetic analysis with signal processing present a survey of the various models for characterizing radio wave propagation in urban and rural environments describe a method wherein it is possible to identify and eliminate multipath without spatial diversity optimize the location of base stations in a complex environment The text is an excellent resource for researchers and engineers working in electromagnetics and signal processing who deal with performance improvement of adaptive techniques as well as those who are concerned with the characterization of propagation channels and applications of airborne phased arrays **Intelligent and Fuzzy Techniques: Smart and Innovative Solutions** Cengiz

Kahraman,Sezi Cevik Onar,Basar Oztaysi,Irem Ucal Sari,Selcuk Cebi,A. Cagri Tolga,2020-07-10 This book gathers the most recent developments in fuzzy machine learning risk assessment heuristics and clustering the book is a valuable resource for academics M Sc and Ph D students as well as managers and engineers in industry and the service sectors **Smart**

Computer Vision B. Vinoth Kumar,P. Sivakumar,B. Surendiran,Junhua Ding,2023-02-27 This book addresses and disseminates research and development in the applications of intelligent techniques for computer vision the field that works on enabling computers to see identify and process images in the same way that human vision does and then providing appropriate output The book provides contributions which include theory case studies and intelligent techniques pertaining to computer vision applications The book helps readers grasp the essence of the recent advances in this complex field The audience includes researchers professionals practitioners and students from academia and industry who work in this interdisciplinary field The authors aim to inspire future research both from theoretical and practical viewpoints to spur further advances in the field **Production and Operations Analysis** Susmita Bandyopadhyay,2019-12-18 The aim of this

book is to cover various aspects of the Production and Operations Analysis Apart from the introduction to basic understanding of each topic the book will also provide insights to various conventional techniques as well as various other mathematical and nature based techniques extracted from the existing literature Concepts like smart factories intelligent manufacturing and various techniques of manufacturing will also be included Various types of numerical examples will also be presented in each chapter and the descriptions will be done in lucid style with figures point wise descriptions tables pictures to facilitate easy understanding of the subject *Digital Systems* Raj Kamal,2009 **Advanced Computational**

Intelligence for Object Detection, Feature Extraction and Recognition in Smart Sensor Environments Marcin Woźniak,2021-09-01 Recent years have seen a vast development in various methodologies for object detection and feature extraction and recognition both in theory and in practice When processing images videos or other types of multimedia one needs efficient solutions to perform fast and reliable processing Computational intelligence is used for medical screening where the detection of disease symptoms is carried out in prevention monitoring to detect suspicious behavior in agriculture systems to help with growing plants and animal breeding in transportation systems for the control of incoming and outgoing transportation for unmanned vehicles to detect obstacles and avoid collisions in optics and materials for the detection of surface damage etc In many cases we use developed techniques which help us to recognize some special features In the context of this innovative research on computational intelligence the Special Issue Advanced Computational Intelligence for Object Detection Feature Extraction and Recognition in Smart Sensor Environments present an excellent opportunity for the dissemination of recent results and achievements for further innovations and development It is my pleasure to present this collection of excellent contributions to the research community Prof Marcin Wo niak Silesian University of Technology Poland

Making Things Smart Gordon F. Williams,2017-07-06 Making Things Smart teaches the fundamentals of the powerful

ARM microcontroller by walking beginners and experienced users alike through easily assembled projects comprised of inexpensive hardware store parts Current ARM programming books take a bland textbook approach focused on complex beginner unfriendly languages like C or ARM Assembler Making Things Smart uses Espruino JavaScript for Hardware flattening the learning curve

Intelligent Electrical Protection in Traditional Networks and Smart Grids Salman Rezaei, 2025-02-20 The main objective of this book is to enlighten readers on the automatic protection control and monitoring of power systems The focus is on the development of intelligent protective algorithms to combat ferroresonance and Sub Synchronous Resonance SSR in both traditional networks and smart grids Initially the book covers the theoretical aspects of ferroresonance SSR and protective relays It then discusses the occurrence of ferroresonance and SSR in the grid and the impact of these phenomena on the operation of electrical components and a variety of protective relays Intelligent algorithms are designed and tested for various types of protective relays The book also introduces a power automation system known as the Universal Protection Control and Power Energy Management Centre UPCPEMC This SCADA based centre includes hardware components and new software for simulation analysis protection control and power system component design Additionally it includes power and energy management programs that are suitable for use in both traditional networks and smart grids

Advances in Natural Language Processing, Intelligent Informatics and Smart Technology Thanaruk Theeramunkong, Rachada Kongkachandra, Thepchai Supnithi, 2018-03-15 This book constitutes the thoroughly refereed proceedings of the Eleventh International Symposium on Natural Language Processing SNLP 2016 held in Phranakhon Si Ayutthaya Thailand on February 10 12 2016 The SNLP promotes research in natural language processing and related fields and provides a unique opportunity for researchers professionals and practitioners to discuss various current and advanced issues of interest in NLP The 2016 symposium was expanded to include the First Workshop in Intelligent Informatics and Smart Technology Of the 66 high quality papers accepted this book presents twelve from the Symposium on Natural Language Processing track and ten from the Workshop in Intelligent Informatics and Smart Technology track SSAI Special Session on Artificial Intelligence

Information Security Theory and Practice. Smart Devices, Pervasive Systems, and Ubiquitous Networks Olivier Markowitch, Angelos Bilas, Jaap-Henk Hoepman, Chris J. Mitchell, Jean-Jacques Quisquater, 2009-08-17 This volume constitutes the refereed proceedings of the Third IFIP WG 11.2 International Workshop on Information Security Theory and Practice Smart Devices Pervasive Systems and Ubiquitous Networks WISTP 2009 held in Brussels Belgium in September 2009 The 12 revised full papers presented were carefully reviewed and selected from 27 submissions for inclusion in the book they are organized in topical sections on mobility attacks and secure implementations performance and security and cryptography

Smart Card Research and Advanced Applications Aurélien Francillon, Pankaj Rohatgi, 2014-06-26 This book constitutes the thoroughly refereed post conference proceedings of the 12th International Conference on Smart Card Research and Advanced Applications CARDIS 2013 held in Berlin Germany in

November 2013 The 17 revised full papers presented in this book were carefully reviewed and selected from 47 submissions The papers are organized in topical sections on security technologies attacks on masking side channel attacks software and protocol analysis side channel countermeasures and side channel and fault attacks

Smart Biosensor Technology
George Knopf, Amarjeet S. Bassi, 2018-11-15 Based on the success of the first edition this second edition continues to build upon fundamental principles of biosensor design and incorporates recent advances in intelligent materials and novel fabrication techniques for a broad range of real world applications The book provides a multi disciplinary focus to capture the ever expanding field of biosensors Smart Biosensor Technology Second Edition includes contributions from leading specialists in a wide variety of fields with a common focus on smart biosensor design With 21 chapters organized in five parts this compendium covers the fundamentals of smart biosensor technology important issues related to material design and selection principles of biosensor design and fabrication advances in bioelectronics and a look at specific applications related to pathogen detection toxicity monitoring microfluidics and healthcare Features Provides a solid background in the underlying principles of biosensor design and breakthrough technologies for creating more intelligent biosensors Focusses on material design and selection including cutting edge developments in carbon nanotubes polymer nanowires and porous silicon Examines machine learning and introduces concepts such as DNA based molecular computing for smart biosensor function Explores the principles of bioelectronics and nerve cell microelectrode arrays for creating novel transducers and physiological biosensors Devotes several chapters to biosensors developed to detect and monitor a variety of toxins and pathogens Offers expert opinions on the future directions challenges and opportunities in the field
